2. RECORDS AND REQUIREMENTS

- 2.1 Records
- 2.2 Requirements

3. TEST EQUIPMENT

- 3.1 Test Sets
- 3.2 Test Telephones

4. TEST PROCEDURE

1. GENERAL INFORMATION

1.1 Description

1.11 This section and the associated point sections provide methods for performing operational tests on custom calling features. Only those features not checked by volume tests will be included in these sections.

1.12 The following is a list of features which will be tested with 634.XX sections:

<u>Section</u>	<u>Feature</u>
634.01	Call Forwarding
634.02	Call Waiting
634.03	Speed Calling
634.04	Three-Way Calling

1.2 Sequence

Before this section can be performed, the following must have been completed:

Section 533	System Verification Juncture Circuits
Section 534	System Verification Service Circuits

1.3 References

1.31 The SD/CD of the titled 634.XX circuit will be used as reference material for these tests.

1.32 Local office records will also be necessary for reference material.

2. RECORDS AND REQUIREMENTS

2.1 Records: The results of the tests of this section shall be recorded on forms SD-97-1313 and SD-97-1315. For detailed information on filling out test records, see Section 6B, Handbook 3.

2.2 Requirements: The tests in this section are based on the No. 3 ESS Performance Requirements BSP 820-650-180.

3. TEST EQUIPMENT

3.1 Test Telephones

3.11 The test phones required for the performance of the tests of the 634.XX sections will be listed in the individual sections.

4. TEST PROCEDURE

4.1 The specific test procedure for each custom calling feature is contained in the individual sections. In general, each feature will be utilized in actual test calls in the same manner as they would be used in an operational cutover office.

4.2 Working System generic program and translations must be loaded and working before performing these tests. Any problems discovered must be resolved before continuing with other tests.
