5. DID TEST CALL
6. CCSA TEST CALL
7. LDN TEST CALL
8. RESTORATION

1. GENERAL

- 1.1 This section provides testing information for DID and CCSA Restriction.
- 1.2 A station line with DID and CCSA Restriction is prevented from receiving incoming exchange network calls via DID and CCSA facilities. These calls are routed to the attendant or to intercept tone, depending upon the option selected.
- 1.3 DID and CCSA Restriction is administered by the Line Class of Service Assignments.

2. RECORDS

- 2.1 Form SD-97-1313 is required for recording the results of these tests.

3. TEST EQUIPMENT AND DOCUMENTATION

3.1 Test Equipment

- 1 500 Type Telephone Set (Dial Pulse)
or
2500 Type Telephone Set (Touch-Tone)

3.2 Documentation

- 3.21 Using the Customer Order Document determine the following:
 - 3.211 From Class of Service Assignments determine a class of service which has DID and CCSA Restriction.
 - 212 From Station Line Assignments pick a station line which has a class of service determined above. (DID and CCSA Restriction.) Note the extension number and equipment location of this line.

4. TEST SET UP

- 4.1 Connect telephone set to station line with DID and CCSA Restriction. This line will be referred to as Station A in the test procedure.

5. DID TEST CALL (OPTIONAL)

- 5.1 If DID trunks are provided arrange for a DID call to Station A.
 - 5.11 Intercept Tone is received or Call is routed to the attendant. Verify option provided.

6. CCSA TEST CALL (OPTIONAL)

- 6.1 If CCSA trunks are provided arrange for a CCSA call to Station A.
 - 6.11 Intercept Tone is received or Call routed to the attendant. Verify option provided.

7. LDN TEST CALL

- 7.1 Arrange to have an LDN call placed.
- 7.2 Attendant answers call and extends to Station A.
- 7.3 Attendant releases call.
 - 7.31 Incoming call and Station A connected. Conversation is satisfactory.

8. RESTORATION

- 8.1 Disconnect telephone set.
