DCTS FEATURE TEST
LAST STATION DIALED

CONTENTS

1. GENERAL
2. RECORDS
3. TEST EQUIPMENT
4. PROCEDURE

1. GENERAL

1.1 This section provides information to test the DIMENSION Custom Telephone Service Last Station Dialed feature.

1.2 The Last Station Dialed feature gives a station user the ability to be automatically connected to the previously dialed line number by momentarily operating an electronic telephone set button.

2. RECORDS

2.1 Form SD-97-1313 is required for recording the results of this test.

3. TEST EQUIPMENT

<u>3.1</u>	<u>Quantity</u>	<u>ITE</u>	<u>Description</u>
	2		Electronic Telephone Sets

4. PROCEDURE

4.1 Preliminary

4.11 Connect two electronic telephone sets to the termination field so that the following conditions are met:

Station A - Provided with the "Last Station Dialed" feature.

Station B - Provided with a line that can be dialed from Station A.

4.2 Test Procedure

4.21 At Station A, go off-hook, confirm dial tone, and then dial a line number associated with Station B. After dial completion, verify:

a. At Station A, that ringback is received.

b. At Station B, that either the tone ringer sounds or the status lamp associated with the dialed number, flashes.

4.22 At Station A, go on-hook, then go off-hook, confirm dial tone, and then momentarily operate the LAST STATION DIALED button. Verify:

a. That Station A receives ringback.

b. At Station B, that either the tone ringer sounds or the status lamp associated with the dialed number, flashes.

4.23 At Station B, answer the incoming call and verify transmission between Station A and Station B.

4.24 Go on-hook with both stations and proceed to the next test section.
