

SUBSCRIBER PLANT
TRANSMISSION INDEX
NOISE COMPONENT DESCRIPTION

1. GENERAL

1.01.1 This addendum is issued to supplement certain parts of the main section. Paragraphs below follow the numbering of the main section.

4. APPLICATION OF THE NOISE COMPONENT

4.01.1 Selection of wire centers to be surveyed during each calendar quarter within a Division shall be performed by the Area Transmission Engineer, who is responsible for the overall coordination of this plan. The noise survey work scheduled during each quarter shall normally be

performed by Plant personnel responsible for maintenance of the wire center. Surveys in a wire center may be made at any time in the quarter in which the wire center is scheduled. It is not necessary that tests be made during busy periods. Division and Area Plant staffs shall prepare summaries and reports from data accumulated as a result of wire center surveys.

4.03.1 Representatives from the staff of the Area Transmission Engineer and General Plant Manager are jointly responsible for performing analysis and follow-up investigations of wire center results where excessive noise is indicated.
