

GRAPHICAL DETERMINATION OF INPUT IMPEDANCE OF  
REPEATING COIL WITH ANY TERMINATING IMPEDANCE  
120DS COIL

1.01 The 120DS repeating coil is electrically equivalent to the 94F repeating coil, for which basic data are provided in Section 304-200-102.

1.02 That section also gives the method of handling the transformer ratio, referring to the charts in Section 304-200-101 and the general discussion in Section 304-200-100.
