

PRIVATE LINE TELEPHONE SERVICE
600/1500-CYCLE SELECTIVE SIGNALING SYSTEM
PERIODIC TESTS

1. GENERAL

1.01 This Section specifies the periodic tests which should be made on the 600/1500-cycle or two-tone selective signaling system adapted for use on multistation private line telephone circuits.

1.02 This Section is reissued to specify an interval of 6 months for all System tests.

1.03 The general requirements for the operation and maintenance of this System are contained in Section 310-430-500.

Test	Test Interval	Initial and Service Tests and Adjustments
Filament Activity	6 Mo.	*
Heater Current	6 Mo.	*
Relays and Selectors	6 Mo.	* ↗
Oscillator Frequencies	6 Mo.	*
Oscillator Output	6 Mo.	*
Receiving Circuit Sensitivity	6 Mo.	* ↘
