

**SPECIAL SERVICE LINK LINEUP
CENTRAL OFFICE TO STATION 2-WIRE
LINK USING E6 REPEATERS**

1. GENERAL

1.001 This addendum supplements Section 311-100-553, Issue 3.

1.002 This addendum is issued to correct a test set switch setting in **A. 830E Network** in Part 9.

9. ADJUSTMENT OF LINE BUILDING-OUT NETWORKS

The following change applies to Part 9 of the Section.

(a) 9.01—revised.

STEP	PROCEDURE
A. 830E Network	
4	▶ Insert the repeater into the turret of the 54B test stand. Rotate the turret so that the adjusting screws on the 830E network are accessible at the front of the test stand. Set switch S1 to RL LINE B and switch S2 to neutral.▶
