

## 43A1 VOICE-FREQUENCY CARRIER TELEGRAPH (VFCT) SYSTEM (J70112-)

### DESCRIPTION AND OPERATION

#### 1. GENERAL

**1.001** This addendum supplements Section 312-700-100, Issue 5.

**1.002** This addendum is issued to:

(a) Add a note pertaining to the use of option WY in 62.5 mA neutral channel terminals equipped with the 262-type switch and 4143B network to Table C.

(b) Correct paragraph 4.02 (c).

#### 2. PHYSICAL DESCRIPTION

The following change applies to Part 2 of this section:

- Add the following note to Table C.

*Note:* When the 262C switch and 4143B network are used in a 62.5 mA neutral channel terminal, the channel terminal must be equipped with option WY of SD-70552-01.

#### 4. METHOD OF OPERATION

The following change applies to Part 4 of this section:

- Paragraph 4.02(c) revised.

**4.02** (c) In the last sentence of the fourth bullet paragraph, change clockwise to read "counterclockwise".
