

Important Notice for XP Users

Due to changes in the Microsoft* policy regarding the Windows* Logo Program, where VPN drivers are newly eligible for driver signature by Microsoft, Nortel Networks* Contivity* VPN Client users on the Microsoft XP operating system will see the following message when installing the version 4.10 or greater software:

The software you are installing for this hardware:
Nortel IPSECSHM Adapter has not passed Windows Logo
testing to verify its compatibility with Widows XP.

Continuing your installation of this software may impair
or destabilize the correct operation of your system either immediately
or in the future. Microsoft strongly recommends that you stop this
installation now and contact the hardware vendor for software
that has passed Windows Logo testing.

Nortel Networks has tested the Contivity VPN Client with XP, and the test results show that version 4.10 or greater of the Contivity VPN Client is compatible with XP.

Nortel Networks is distributing the Contivity VPN Client V4.10 or greater under the standard Contivity VPN Client end-user license. Meanwhile, Nortel Networks is working to resolve the issue with the updated Microsoft Logo Program as quickly as possible.
