

**A1 DIGITAL TRANSMISSION
USING FOUR-PHASE DATA SETS
INITIAL TESTING AND LINE-UP PROCEDURE**

1. GENERAL

Not more than 90 counts/30 minutes at 50 dbrn0.

1.001 This addendum supplements Section 314-550-305, Issue 2.

(Referred to 0 TLP)

1.002 The addendum is reissued to delete duplicate information.

(b) For N2-type sections.

Add:

3.09 As measured in 3.08, the impulse noise should not exceed the following limits:

Not more than 90 counts/30 minutes at 77 dbrn0.

(a) For compandored sections other than N2 type.

(6A Counter should be set for "39 dbrn" and "Add 30" when measuring at the DO-DG jacks.)
