Universal Edge 9000 Index	4-1

About this document

Use this index as a guide to the AccessNode, AccessNode Express, and Universal Edge 9000 libraries. Major topics of the documentation suite are listed alphabetically in this index.

The UE9000 index is included as a separate index. Its entries are also combined with the AccessNode index.

How to interpret an index entry

A typical entry in this index indicates the location of a topic by volume, by document number, and by page number. Here is an example:

Section-level overhead
(V2A 100) 12-4
carried by SONET overhead bus (V2A 102) 3-3

This index entry refers to two separate documents.

- Page 12-4 of *Configuration and Equipment Description*, 323-3001-100, in *Description*, Volume 2A contains information on the section-level overhead.
- Page 3-3 of *Signal Flow and Circuit Pack Description*, 323-3001-102, in *Description*, Volume 2A contains information on how the section-level overhead is carried by the SONET overhead bus.

Note: Separately bound documents will not have a Volume designation. Here is an example:

ModCab
description (119) 5-10

This index entry refers to this document.

- Page 5-10 of *Modular Cabinet Description*, 323-3001-119.

Alphabetical chapter prefixes

For entries in *Log Report Manual*, 323-3001-840, in *Maintenance*, Volume 5B, the prefix to the page number is alphabetic rather than numeric. For example, the index entry for HMU logs is

HMU (NE log) (V5B 840) HMU-1

This entry indicates that page HMU-1 of *Log Report Manual*, 323-3001-840, in *Maintenance*, Volume 5B contains information on HMU network element logs.

Volume identifiers

The index uses the volume identifiers shown below.

Volume Identifier	Name of the volume
(V1)	Engineering, Configuration, and Ordering Guide
(V2A) (V2B)	Description
(V3A) (V3B)	Commissioning and Testing
(V4A) (V4B) (V4C)	Operations, Administration, and Provisioning
(V5A) (V5B) (V5C)	Maintenance
(ANX)	AccessNode Express
"Volume Name"	Name of Installation guides and other separately bound documents

Some volumes require two binders. These binders are indicated by a letter (A or B) that appears after the volume number.

Note: AccessNode Volumes 1 through 5 are shipped with AccessNode product orders only. The AccessNode Express volume is shipped with AccessNode Express product orders only. Separately bound documents are included with the products to which they refer.

Document numbers

The index lists the last three digits of the ten-digit document number for the NTP. For example, the number 100 identifies document 323-3001-100, which is *Configuration and Equipment Description*.

AccessNode, AccessNode Express, and Universal Edge 9000 documents

This chapter describes the documentation in the AccessNode, AccessNode Express, and Universal Edge libraries, and lists the contents of all volumes and related documents in the library.

For ordering information on AccessNode documents, refer to *Engineering and Ordering Information*, 323-3001-032, in *Engineering, Configuration, and Ordering*, Volume 1.

Chapter contents

This chapter contains the following information:

Topic	See
Web delivery	page 1-2
CD-ROMs	page 1-2
Printed documentation	page 1-2
AccessNode library, NT4K00LA	page 1-3
AccessNode Express library, NT4K00LH	page 1-10
UE9000 library, NTNP00AA	page 1-13

Web delivery

AccessNode documentation is now available on the worldwide web in an easy-to-use format. Contact your regional Nortel Networks representative for more information.

CD-ROMs

The following CD-ROMs are available:

NTP number	Document title	Order number
–	<i>CD-ROM</i> (PDF files, multimedia interface) — contains AN, ANX, and UE9000 documents	NT4K00LP/A0778318
–	<i>CD-ROM</i> (PDF files, Helmsman interface) — contains AN, ANX, and UE9000 documents	NT4K00LR/A0778742
–	<i>ANX 24L/48L Installation CD-ROM</i>	NT4K00LT/A0779810

Printed documentation

The issue of a document is indicated by the issue number. The issue number is a two-digit number separated by a decimal point; for example, 1.0.

A major change is indicated by an increment in the first digit. A minor change is indicated by an increment in the second digit.

For example, the issue of a document is at 1.0. If a major change is incorporated, the issue number of the document changes to 2.0. If a minor change is incorporated, the issue number of the document changes to 1.1.

AccessNode library, NT4K00LA

The AccessNode library includes five volumes. Other documents are available separately. The following sections contain short descriptions of the volumes and the other documents. The AccessNode library can also be ordered using the common product code (CPC) A0778314.

Engineering, Configuration, and Ordering Guide, Volume 1

The *Engineering, Configuration, and Ordering Guide* provides engineers and product evaluators with information about how to engineer, order, and configure AccessNode equipment. The guide contains information about new installations as well as upgrading existing systems. It also includes information about traffic engineering, installation planning, and performance specifications.

Note: Volume 1 is part of the AccessNode library and is shipped when NT4K00LA is ordered. Volume 1 can be ordered separately using the CPC P0904223.

The *Engineering, Configuration, and Ordering Guide* comes in one binder, containing the following documents in the sequence shown below.

NTP number	Document title	Issue
323-3001-030	<i>About the AccessNode Library</i>	4.0
323-3001-032	<i>Engineering and Ordering Information</i>	3.0
323-3001-154	<i>Mapper Layouts Planning Guide</i>	3.0
323-3001-155	<i>Line Card Application and Special Services Engineering</i>	3.0
323-3001-200	<i>Site Installation Planning and Engineering</i>	2.0

Description, Volume 2

The *Description* volume is for strategic planners, provisioners, engineers, and network administrators. It describes the types of AccessNode systems that are available, as well as configurations, equipment, modular layout, features, and services. It provides brief descriptions of the system topologies and the software used by AccessNode.

Note: Volume 2 is part of the AccessNode library and is shipped when NT4K00LA is ordered. Volume 2 can be ordered separately using the CPC P0904231.

The *Description* volume comes in two binders, Volume 2A and Volume 2B. The volume consists of the following documents in the sequence shown.

NTP number	Document title	Issue
Volume 2A		
323-3001-100	<i>Configuration and Equipment Description</i>	3.0
323-3001-102	<i>Signal Flow and Circuit Pack Description</i>	2.0
323-3001-103	<i>Protection Switching Description</i>	2.0
323-3001-104	<i>Alarms and Surveillance Description</i>	2.0
323-3001-105	<i>Performance Monitoring Description</i>	1.0
Volume 2B		
323-3001-115	<i>Line and Loop Testing Overview</i>	3.0
323-3001-180	<i>System Specifications</i>	1.0
323-3001-181	<i>Line Card Specifications</i>	3.0

- *Features and Services Description*, 323-3001-101, has been replaced by the *AccessNode Application and Feature Overview*.

Commissioning and Testing, Volume 3

The *Commissioning and Testing* volume contains the information needed to test and commission each network element, to connect the tested network elements into the required system configuration, and to perform system tests.

Note: Volume 3 is part of the AccessNode library and is shipped when NT4K00LA is ordered. Volume 3 can be ordered separately using the CPC P0904232.

The *Commissioning and Testing* volume is divided into two binders. The first binder contains four separately bound documents that contain the procedures for setting up your system based on system type. The second binder contains the remainder of Volume 3. The volume consists of the following documents in the sequence shown below.

NTP number	Document title	Order Number	Issue
Volume 3A			
323-3001-230	<i>Setting Up Your System: VTBM</i>	P0906796	2.0
323-3001-235	<i>Setting Up Your System: DFA</i>	P0906797	3.0
323-3001-240	<i>Setting Up Your System: Point-to-Point</i>	P0906798	3.0
323-3001-245	<i>Setting Up Your System: Single-Ended</i>	P0906799	2.0
Volume 3B			
323-3001-220	<i>Optional Commissioning Procedures</i>	–	2.0
323-3001-221	<i>Site Testing Procedures</i>	–	2.0
323-3001-222	<i>System Testing Procedures</i>	–	1.0
323-3001-223	<i>Line Test Interface Commissioning Procedures</i>	–	2.0
323-3001-225	<i>DS1 Feeder Testing Procedures</i>	–	2.0

Operations, Administration, and Provisioning, Volume 4

The *Operations, Administration, and Provisioning* volume contains the operations, administration, and provisioning tasks that can be performed from the operations controller (OPC) user interface, and from the network element (NE) user interface. This volume also includes system-expansion information.

Note: Volume 4 is part of the AccessNode library and is shipped when NT4K00LA is ordered. Volume 4 can be ordered separately using the CPC P0904233.

The *Operations, Administration, and Provisioning* volume comes in three binders, Volume 4A, Volume 4B, and Volume 4C. The volume consists of the following documents in the sequence shown below.

NTP number	Document title	Order number	Issue
Volume 4A			
323-3001-300	<i>Network Element User Interface Description</i>	–	2.0
323-3001-301	<i>OPC User Interface Description</i>	–	4.0
323-3001-302	<i>System Administration Procedures</i>	–	4.0
323-3001-304	<i>Data Administration Procedures</i>	–	1.0
Volume 4B			
323-3001-310	<i>Provisioning and Operations Procedures</i>	–	2.0
323-3001-311	<i>Protection Switching Procedures</i>	–	2.0
323-3001-315	<i>Line Card Provisioning Procedures</i>	–	3.0
323-3001-316	<i>Line Card Testing Procedures</i>	–	3.0
Volume 4C			
323-3001-324	<i>System Expansion Procedures</i>	P0904347	2.0
–	<i>Span of Control Consolidation</i>	P0887941	1.0
–	<i>Addition of AN Nodes in a VTBM Ring</i>	P0887942	1.0
–	<i>Removal of AN Nodes in a VTBM Ring</i>	P0887943	1.0

Maintenance, Volume 5

The *Maintenance* volume contains the maintenance tasks that can be performed from the operations controller (OPC) user interface and from the network element (NE) user interface. The volume includes trouble-clearing, recovery, and maintenance procedures.

Note: Volume 5 is part of the AccessNode library and is shipped when NT4K00LA is ordered. Volume 5 can be ordered separately using the CPC P0904236.

The *Maintenance* volume comes in three binders, Volume 5A, Volume 5B, and Volume 5C. The volume consists of the following documents in the sequence shown below.

NTP number	Document title	Issue
Volume 5A		
323-3001-543	<i>Alarm and Trouble Clearing Procedures</i>	3.0
Volume 5B		
323-3001-840	<i>Log Report Manual</i>	3.0
Volume 5C		
323-3001-510	<i>Network Surveillance Procedures</i>	1.0
323-3001-520	<i>Performance Monitoring Procedures</i>	2.0
323-3001-545	<i>Recovery Procedures</i>	1.0
323-3001-546	<i>Routine Maintenance Procedures</i>	2.0
323-3001-547	<i>Module Replacement Procedures</i>	3.0
323-3001-548	<i>Circuit Testing from the OPC User Interface</i>	1.0

Separate documents in the AccessNode library

In addition to the volumes, additional documents are included in the AccessNode library and are shipped with the AccessNode suite.

Some documents are ordered based on your configuration. These documents provide network planners, engineers, and installers with information on how to install AccessNode equipment and enclosures.

Separately bound documents that ship with the AccessNode suite

NTP number	Document title	Order number	Issue
323-3001-002	<i>Master Index</i>	P0904238	2.0
323-3001-850	<i>List of Terms</i>	P0904251	1.0
323-3001-152	<i>Traffic and Bandwidth Engineering Information</i> (engineering tool software is on the Helmsman CD-ROM)	P0904247	1.0
323-3001-190	<i>TL1 Interface Description</i>	P0904250	1.0
323-3001-201	<i>Bay in Central Office Installation Manual—ABM</i>	P0911128	1.0
–	<i>ABM Bay Cable Connection Quick Reference Guide</i>	P0887749	1.0
323-3001-202	<i>Bay in Central Office Installation Manual—TBM</i>	P0887754	2.0
–	<i>Provisioning Quick Reference Guide</i>	P0887750	1.0
–	<i>Group and Slot Quick Reference Card</i>	P0887751	1.0
–	<i>Technical Support Quick Reference Card</i>	P0887752	1.0
–	<i>AccessNode Incremental Software Delivery QRC</i>	P0904353	1.0
–	<i>TL1 at the Command Line QRG</i>	P0904352	1.0
–	<i>Install/Replace Digital Test Access Pair QRC</i>	P0904831	1.0

AccessNode separately bound documents ordered based on configuration

NTP number	Document title	Order number	Issue
323-3001-110	<i>Modular Business Package Description</i>	P0887756	1.0
Addendum 1 to 323-3001-200	<i>MBP Site Installation Planning and Engineering</i>	P0911127	1.0
323-3001-206	<i>Modular Business Package Cabinet Installation Manual</i>	P0887757	1.0
–	<i>MBP VTBM Ring Installation Guide</i>	P0887758	1.0
–	<i>MBP VTBM Ring User Guide</i>	P0904244	1.0
323-3001-118	<i>Series 800A Outside Plant Cabinet Description</i>	P0887760	1.0
323-3001-210	<i>Series 800A Outside Plant Cabinet Installation Manual</i>	P0887761	1.0

–	<i>MCOT to ABM Commissioning QRG</i>	P0903573	1.0
–	<i>AN2016 User Guide</i>	P0905277	1.0
–	<i>AN Step-In Cabinet Guide</i>	P0905278	1.0
–	<i>AN17 Planning Guide</i>	NTR410LA/A0778676	1.0

Note: The *Data Direct User Guide* has been discontinued.

AccessNode Express library, NT4K00LH

The AccessNode Express library contains the *AccessNode Express* volume (one binder). Other documents are available separately.

Note: The AccessNode Express library can also be ordered using the CPC A0778681.

AccessNode Express volume

The *AccessNode Express* volume consists of the following documents in the sequence shown below.

NTP number	Document title	Order number	Issue
323-3001-030	<i>About the AccessNode Library</i>		4.0
323-3051-032	<i>AccessNode Express Customer Ordering Guide</i>	P0904254	3.0
323-3051-100	<i>AccessNode Express Configuration and Equipment Description</i>		3.0
323-3051-220	<i>AccessNode Express Commissioning and OAM&P</i>		3.0
323-3001-850	<i>List of Terms</i>	P0904251	1.0

The following documents have been moved:

- *AccessNode Express List of Terms*, 323-3051-850 has been replaced with the *List of Terms*, 323-3001-850.

Separate documents in the AccessNode Express library

In addition to the volume, additional documents are included in the AccessNode Express library and are shipped with the AccessNode Express suite.

Some documents are ordered based on your configuration. These documents provide network planners, engineers, and installers with information on how to install AccessNode equipment and enclosures.

Separately bound documents that ship with the AccessNode Express suite

NTP number	Document title	Order number	Issue
323-3051-210	<i>AccessNode Express Installation Guide</i>	P0904252	2.0
323-3051-211	<i>AccessNode Express Maintenance Guide</i>	P0904253	2.0
