

TYPE N3 CARRIER TELEPHONE SYSTEM
VOICE-FREQUENCY AMPLIFIER
THROUGH-CHANNEL CONNECTOR AND PAD UNIT
OVERALL LINEUP

1. GENERAL

The following changes apply to the procedure.

1.001 This addendum supplements Section 362-900-510, Issue 3. The attached pages must be inserted in the section in accordance with the filing instructions above.

Step 2—revised

Step 3—revised

1.002 This addendum is issued to correct the output requirement of the VF transmit amplifier and to make procedural changes. The corrections are necessary because the output of the VF transmit amplifier should not exceed +16.8 dB for data or message circuits. Tones in excess of +16.8 dB could cause a group failure.

Step 6—revised

Step 6.1—added

Step 6.2—added
