

MICROWAVE ANTENNAS
KS-15676 HORN-REFLECTOR AND WAVEGUIDE SYSTEM
INSTALLATION
KS-15676 L15 MODIFICATION KITS

1. GENERAL

1.001 This addendum, Issue 1, supplements Section 402-421-220, Issue 1.

1.002 This addendum is issued to add a new paragraph 1.03 as follows:

1.03 During the development period of the hardening kit described in this section, two kits were provided to accommodate construction differences in the antenna permitted by manufacturing options. These two kits were designated L15 and L16 and references to both lists may, therefore, be encountered in the literature of this period. Later, the design was modified so that the L15 kit is applicable to any horn-reflector antenna and the L16 designation discontinued, without ever having been put into production. Therefore, all previous references to the L15 or L16 kit are now covered by the L15 kit alone.
