

June 5, 1970

N O T I C E

To Recipients of the Bell System Voice Communications Technical References:

The Technical Reference for Voice Connecting Arrangement CEK describes the indication to customer-provided equipment as a message registration "pulse". It should be called to your attention that in some cases, particularly with certain step-by-step Central Offices, the indication will be a continuous contact closure maintained for the duration of the call.

It is suggested that this notice be attached to your copy of the Technical Reference for Voice Connecting Arrangement CEK dated April 1970.

Very truly yours,

Diane E. Polacik
