

725A-TYPE CONNECTING BLOCK

IDENTIFICATION

CUSTOMER PARTICIPATION PRODUCTS

1. GENERAL

1.01 This section provides general information on the 725A-type modular connecting block for use in the Customer Convenience Product (CCP) line and the Customer-Provided Inside Wiring (CPIW) Program.

1.02 This section is reissued to:

- (a) Revise Fig. 1 to change wiring layout
- (b) Add Fig. 2.

Revision arrows are used to emphasize the more significant changes.

2. IDENTIFICATION

2.01 The 725A-type connecting block (Fig. 1) comes in two colors, 725A-50S (ivory) or 725A-54S (brown). The 725A-50S and 725A-54S connecting blocks are a combination of the 725C-50 and 725C-54 connecting blocks which utilize snap-on connectors and a 42D connecting block (Fig. 2) which uses 990A slotted-beam connectors.

2.02 The 725A-50S and 725A-54S connecting blocks come packaged in a blister-type package with two wood screws for mounting and complete directions for placement. They are for customer use only and are available at Bell retail outlets such as Phone Center Stores, Bell Customer Service Centers, or Bell Phone Booths.

NOTICE

Not for use or disclosure outside the
Bell System except under written agreement
