1. GENERAL

1.01 This section provides information on the 953A-S tool used in conjunction with the Customer Convenience Product (CCP) line for the Customer-Provided Inside Wiring (CPIW) Program.

1.02 Whenever this section is reissued, the reason(s) for reissue will be listed in this paragraph.

1.03 The 953A-S tool (Fig. 1) will be packaged in a special blister pack which will include complete instructions for its use.

2. IDENTIFICATION

2.01 The 953A-S tool is intended for customer use in placing their own inside wire and modular connecting blocks. It provides a means for a customer to safely and easily measure and remove the outer jacket on D station wire. It provides a means for the customer to safely hold a wire staple when fastening D station wire to the wall. It also provides a simple means of removing connecting block breakout tabs for wire entrance into the block.
