

A.E.CO. 92-N AND 92-W PREPAY COIN TELEPHONE SETS
CONNECTIONS

1. GENERAL

1.01 This section provides connection drawings for Types 92-N and 92-W coin telephone sets. The 92 series coin telephone sets provide prepay service. The 92-N and 92-W sets are equipped with F1A type components. The 92-W

sets have W.E.Co. dials and the 92-N sets have A.E.Co. dials. Figure 1 shows the wiring diagram for a set equipped for single-nickel service. The wiring diagram for a set equipped for two-nickel service is shown in Figure 2. The wiring diagram for a 92-N set arranged for dime-only service in a manual exchange is shown in Figure 3.

SECTION 476-202-400
ISSUE 1

- NOTES:
- 1 - STRAP TERMINALS 2 & 6 AND 3 & 4 WHEN NO DIAL IS REQUIRED.
 - 2 - CONTACT "X" TO BREAK FIRST & MAKE LAST.
 - 3 - WHEN USED WITH REPEATERS THAT DO NOT REQUIRE A SHUNTED DIAL CONTROL, DISCONNECT CLIP "Y."
 - 4 - VARISTOR "VR" USED WHEN SPECIFIED.
 - 5 - TAPE LEADS NOT USED.
