

SINGLE-LINE, PUSHBUTTON DIAL, HANDSFREE TELEPHONES

CIRCUIT LABELS

1. GENERAL

1.01 This document covers the single-line, pushbutton dial, handsfree telephones. (See Figure 1.) Circuit labels for single-line, pushbutton dial, handsfree telephones are included. (See Table A.)

AW 86-355

Figure 1: Single-Line, Pushbutton Dial, Handsfree Telephone

1.02 This section is reissued to provide the latest issue circuit label for the single-line, pushbutton dial, handsfree telephones. Issue 2 of this section provided a new circuit label of the telephones.

1.03 For additional information on description and installation of the telephones, refer to Section 50-844-103. A replacement parts list and an exploded-view drawing for the telephones are contained in Section 50-844-104. Related documents of the ITT Telephone Apparatus Practices Manual provide information on components.

1.04 The Model 2844 handsfree telephones are identified by a code number stamped in ink on the bottom of the base plate. Refer to Section 50-844-103 of the ITT Telephone Apparatus Practices Manual for ordering information and for an explanation of each code number.

1.05 The Model 2844 handsfree telephones are single-line, pushbutton dial, anti-sidetone type units that operate efficiently over a wide range of loop resistances and line impedances.

1.06 Handsfree telephones are equipped with a microphone and loudspeaker that combine with the telephone circuitry to permit their use without having to hold the handset. This feature may be switched ON or OFF. When OFF, the telephone is used in the normal manner. When ON, a user may converse on the telephone from any direction at a distance of several feet.
