TEL-TREX, SINGLE-LINE, PUSHBUTTON DIAL, DESK/WALL TELEPHONES WITH TONE/PULSE SWITCH, MEMORY, AND LOCAL HOLD REPLACEMENT PARTS

1. GENERAL

1.01 This document covers the Tel-Trex, single-line, pushbutton dial, desk/wall telephones. (See Figure 1.) An exploded-view drawing of the telephone with major assembly groups (see Figure 2) and a replacement parts list (see Table A) are included.

1.02 Whenever this section is reissued, reason for reissue will be listed in this paragraph.

1.03 For additional information on description and installation of the telephones, refer to Section 50-980-100. Circuit labels are not provided for the telephones. Related documents of the CORTELCO Telephone Apparatus Practices Manual provide information on components.

1.04 The Tel-Trex desk/wall telephones are single-line, pushbutton dial, anti-sidetone units that operate efficiently over a wide range of loop resistances and line impedances. The telephones are compatible with inductively-coupled hearing aid devices. The telephones can be used in Centrex/PABX applications.

1.05 The Tel-Trex telephones are identified by a coded label affixed to the bottom of the telephone. Refer to Section 50-980-100 of the CORTELCO Telephone Apparatus Practices Manual for ordering information of complete telephones and for an explanation of each code number.
