

RINGING LIMITATIONS

1. GENERAL

1.01 This addendum supplements Section 500-114-100. It is issued to provide ringer limitations for Nippon Electric Company PBX's and the NC-23 Portable Central Office and state the dc resistance value used for party identification.

1.02 This addendum is reissued to:

- (a) Correct ringer limitations

2. PARTY IDENTIFICATION

2.01 The dc resistance value used by the S.N.E.TEL. Co. for party identification will be 2650 ohms.

3. RINGER LIMITATIONS FOR NEC SWITCHING EQUIPMENT

3.01 The maximum number of ringing bridges per PBX station associated with the NA4-09, NEPAX and NA-120 PBX's is three excluding limitations.

(a) Limitations:

- (1) The distance a PBX station is from the PBX.  
(Station not considered an O.P. Station)
- (2) Refer to Paragraph 6.01, 6.02, 6.03 and 6.04 of this practice for other special limitations.

3.02 The maximum number of ringing bridges per main station served by the NC-23 Portable Central Office is five (5).
