

## AMPLIFIERS—315-TYPE

### 1. GENERAL

1.01 This section contains identification information for the 315A (Fig. 1) and 315B (Fig. 2) amplifiers for customers with impaired hearing.

1.02 Whenever this section is reissued the reason for reissue will appear in this paragraph.

### 2. IDENTIFICATION

2.01 The 315A and 315B amplifiers consist of component apparatus mounted on a printed circuit board supported by a plastic chassis. Mounting screws and a coverplate are included.

2.02 These amplifiers are components of 226A (315A) and 2226A (315B) hand telephone sets and provide up to 20dB of variable gain in the receive circuit.

2.03 These amplifiers are to be used primarily for customers with impaired hearing, although they can also be used in noisy locations. These amplifiers should *not* be used to correct transmission problems.

2.04 For installation and maintenance information on these amplifiers, refer to Section 502-303-102.
