

220-, 226-, 2220-, AND 2226-TYPE TELEPHONE SETS IDENTIFICATION, INSTALLATION, CONNECTIONS, AND MAINTENANCE

1. GENERAL

1.001 This addendum supplements Section 502-303-102, Issue 3. Place this pink sheet ahead of Page 1 of this section.

1.002 This addendum is issued to show the 220-, 226-, 2220-, and 2226-type telephone set bases manufactured after 6-1-82 will be marked (under or near the date code) "1-PTY". This marking indicates that the base cannot be used for multiparty service connections or A-lead control.

2. CHANGES TO SECTION

2.001 On Page 1, add the following note after paragraph 2.01:

Note: Telephone set bases *not* marked "1-PTY" are adaptable for all classes of line and ringer connections and for A-lead control. Bases marked "1-PTY" cannot be used for multiparty service connections or wired for A-lead control. If service other than individual or bridged ringing is required, an AC2MP or AD3M base, housing, and handset must be ordered separately.
