

SERVICE

565LK AND 565LKM TELEPHONE SETS

1. GENERAL

1.01 This section provides connection information for the 565LK (MD) and 565LKM telephone sets (Fig. 1).

1.02 Reissued to:

- Show 565LK telephone set MD
- Change 2.10 to include lead colors
- Revise Fig. 1, spare leads insulated and stored, change Note 4

1.03 ♦The 565LKM modular telephone set is similar to the 565LK except the modular G15A handset with its associated H4DU handset cord and 616D jack assembly is used in place of the hard-wired G3A-type handset and cord.♦

2. CONNECTIONS

2.01 These sets are factory-wired for use with 1A1 or 1A2 KTS, 3-type or 4A speakerphone, and individual or common line ringer.

2.02 When used with 1A KTS and optional features, modify set as shown in Fig. 2 or 3.

2.03 The hold key position can be illuminated, but 51A lamp is not furnished with set and must be ordered separately.

2.04 The 4th key position is convertible from line pickup (locking) to signaling (nonlocking) by removal of the 811218924 (P-12A892) screw detail. Arrange wiring as shown in Table A.

2.05 These telephone sets are factory-equipped with a KS-20419L1 (10 volt ac only) buzzer.

2.06 Cutoff of internal station ringer or buzzer can be made using the cutoff key on the 589AJ key. Arrange wiring as shown in Table B. To cutoff an external circuit, arrange wiring as shown in Table C.

2.07 Early model sets were furnished from the factory with H1A (MD) ringer, current models have H1B ringer.

2.08 A 812559623 (P-25E962) auxiliary terminal strip (ordered separately) is available for auxiliary services such as buzzers, lamps, etc.

2.09 A D-179935 Kit of Parts (ordered separately) can be installed in the 565LK set when the exclusion feature is required. Connections are made in accordance with Table D.

2.10 When a 565LK or 565LKM telephone set is not used as a speakerphone set and is multiplied with any other set furnishing speakerphone feature, speakerphone leads must be disconnected, insulated, and stored either at the telephone set or at the multiplying point. If not disconnected, the speakerphone leads will provide a common path between the circuits of the multiplied telephone sets. The leads to be removed are as follows: T1 (V-G), R1 (G-V), P3 (V-BR), P4 (BR-V), AG (V-S), and LK (S-V). Speakerphone connections are shown in Division 512.

2.11 Installation of optional items such as exclusion, auxiliary terminal strip, etc., and maintenance information common to 6-button sets can be found in Section 502-500-120.

NOTICE

Not for use or disclosure outside the
Bell System except under written agreement

Fig. 1—565LK (MD) or 565LKM Telephone Set, Connections (Sheet 1 of 2)

NOTES:

1. 66E-TYPE CONN BLK SHOWN. MTG CD MAY BE PLUGGED DIRECTLY INTO CONN CABLE. COLORS AND PIN NOS FOR CONN CA ARE SAME AS MTG CD.
2. IF CAPACITOR IS NOT REQUIRED IN RINGER CKT, MOVE (S) RINGER LEAD HIA RINGER OR (R) RINGER LEAD HIB RINGER TO A OF NET.
3. IF EXCLUSION FEATURE IS ADDED, CONNECT SWITCH LEADS PER TABLE D.

4. DISCONNECT T1(V-G), R1(G-W), P3(V-BR), P4(BR-V), AG(V-S), AND LK(S-V) LEADS WHEN SETS NOT EQUIPPED WITH SPEAKERPHONE ARE MULTIPLIED. DISCONNECT EITHER AT SET OR MULTIPLYING POINT.
5. IF HOLD POSITION LAMP IS REQUIRED, USE SPARE PAIR AND TERMINATE ON LH AND LG TERMINALS.
6. 565LK SETS ARE FURNISHED EQUIPPED WITH G3A6 HANDSET AND CORD. 565LKM SETS ARE FURNISHED EQUIPPED WITH G15A HANDSET, H4DU HANDSET CORD, AND 616D JACK ASSEMBLY.
