

SERVICE

752-TYPE TELEPHONE SETS

1. GENERAL

1.01 This section is issued to provide maintenance and connection information on the 752-type telephone set when used with 1A, 1A1, or 1A2 Key telephone systems. The connection information for the 752-type telephone set was formerly contained in Section 502-750-402 which is hereby canceled.

2. MAINTENANCE

2.01 Work done on customer's premises should be limited to replacement of accessible parts which are available through supply channels; refer to ordering guide tables in Reference section.

2.02 Ringers, handsets, dials, etc. used in these sets should be maintained in accordance with section covering the particular item.

Note: On the P1A ringer, with the volume control lever in the extreme low position, it shall not be necessary for the clapper to strike the gong as long as the armature is vibrating.

Mat

2.03 The exterior of these sets should be clean and not marred or chipped. The vinyl-faced mat may be cleaned with a water-dampened KS-2423 or equivalent cloth. Replace defective mat as follows:

- (1) Grasp mat retainer frame at top, lift upward and out to release frame from panel of set.
- (2) Remove handset from hook of set.
- (3) Pull out handset cord to allow working slack.
- (4) Remove mat from face of panel.
- (5) Remove grommet from mat as shown in Fig. 1.

- (6) Install grommet in new mat by reversing procedure used in removal.
- (7) Position mat on panel and secure using the mat retainer frame.

3-Type Cord Reel

2.04 To test the cord reel, pull the handset cord out to its maximum length. With the cord maintained perpendicular to the panel, the cord should retract fully. Any twists in the cord should be removed before making test.

2.05 Replace the cord reel if the cord will not retract or if the cord is frayed, kinked, or noisy. Field maintenance of the cord reel, or replacement of the cord, is not recommended.

762A Loudspeaker and P-29E579 Transmitter

2.06 These components are used in 3-type speakerphone system. Refer to appropriate connection and maintenance section in Division 512.
