

## TELEPHONE SETS

### 940-TYPE

### IDENTIFICATION, INSTALLATION, AND CONNECTIONS

#### 1. GENERAL

**1.01** This section provides identification, installation, and connection information for the 940A, 940B, and 940C (Fig. 1) DESIGN LINE\* telephone (*Celebrity*) sets.

\* Trademark

**1.02** This section is reissued to:

- Add D-180600 Kit of Parts
- Add new Fig. 4, telephone company-owned components
- Remove Uniform Service Order Code (USOC) and D-Kit of Parts, Table A

**Warning:** *Telephone apparatus or wiring shall not be installed in a location where minimum separation from other wiring as specified in Section 460-300-149 cannot be maintained.*

**1.03** The customer's premises must be properly wired with an appropriate jack in order to accept the D4BU-29 plug-ended mounting cord and/or 225A adapter furnished with each telephone set.

#### 2. IDENTIFICATION

**2.01** The 940A, 940B, and 940C rotary dial equipped telephone sets are new DESIGN LINE telephone sets being made available to the customer. The customer buys the housing, handset, and decorative features from the telephone company and the telephone company retains ownership of the transmission and signaling components which are mounted on a removable base and incorporated in the handset (Fig. 2, 3, and 4).

Fig. 1—940-Type DESIGN LINE Telephone Set

#### Ordering Guide (Refer to Table A)

#### 2.02 Basic Telephone Set Ordering Information:

Example: Set, Telephone, 940A40-50† is an ivory set equipped with a rotary dial and a chrome trim applique (Fig. 1).

† Refer to Table A for available color and applique information.

**2.03** These telephone sets are intended to be used as single line or two-party common battery desk sets and cannot be used on four- and eight-party service.

#### 3. INSTALLATION AND CONNECTIONS

**3.01** These telephone sets are furnished from the factory fully assembled and wired for bridged ringing. †The P1A ringer is shipped from

Fig. 2—Customer-Owned Components 940A or 940B Telephone Set

Fig. 3—Customer-Owned Components, 940C Telephone Set

the factory with the bias spring in the low bias position. To connect the telephone set, plug the mounting cord into a 625A jack or if the existing

jack is a 548A or equivalent, use the 225A adapter furnished with each set.

**3.02** The internal connections for the 940-type telephone sets nonkey system use is shown in Fig. 7.

**3.03** Connections for 1A KTS do not require any telephone set modifications and are wired same as Fig. 7.

**3.04** Connections for use with 1A1 or 1A2 KTS are shown in Fig. 8. Table C includes necessary wiring modifications required for 1A1 or 1A2 key telephone system use.

**3.05** To gain access to the interior of these sets for wiring changes, refer to Part 4.

**3.06 Line and Ringer Connections:**

- (1) For single line and two-party service, refer to Table B.
- (2) For adjustments and ringer cutoff feature of the P1A ringer, refer to Section 501-259-101.

**4. REMOVAL OF TELEPHONE COMPANY-OWNED COMPONENTS**

**4.01** When it is desired to discontinue telephone service of the 940-type design line telephone set proceed as follows:

◆**Note:** Remove the telephone company-owned components that are screwed to the base or can otherwise be easily removed. Refer to Fig. 4 for identification of company-owned components.◆

- (1) Remove handset cord from handset and telephone set base.
- (2) Remove mounting cord from telephone set base and wall jack or adapter.
- (3) Remove three housing mounting screws located on bottom outer edge of the baseplate (Fig. 5 or 6).
- (4) Remove upper and lower housing by lifting them off.
