

COIN TELEPHONE SHELVES

19- AND 20-TYPE

1. GENERAL

1.01 The 19- and 20-type shelves have been rated MD.

1.02 Information on these shelves was formerly contained in the following:

- Identification—508-120-100
- Installation and Maintenance—508-120-200

These sections are hereby canceled.

2. MAINTENANCE

2.01 Clean the surfaces which are not badly scratched or marred with a mild detergent and warm water. After drying, the surface of

the 19-type shelf shall be polished with furniture polish or an approved equivalent.

2.02 When the condition of the 19-type shelf is such that cleaning would not be sufficient, the surface should be sanded and finished.

2.03 Inspect security of mounting screws and brackets. Tighten loose screws; replace or relocate if tightening is not possible. Also inspect security of staples on the 20-type shelf and correct any defects.

2.04 The shelf should be free of loose dirt or other objectionable material.

2.05 Replace directories that show signs of excessive wear or damage.
