

SUBSCRIBER SETS

LOCAL BATTERY — CONNECTIONS

GENERAL

1.00 INTRODUCTION

This section covers general information for the connection of local battery talking—common battery signaling subscriber sets.

2.00 GENERAL

2.01 Selection of the proper types of apparatus to be used in combination for a desired service is covered in sections on the selection of station sets or coin station sets.

2.02 Specific information for connection along with combinations of apparatus and circuit diagrams is covered in individual sections for each type of subscriber set.

2.03 The circuit diagrams in the individual sections may be associated with the circuit diagram of appropriate hand telephone sets or coin collectors to provide complete information for the connection of station apparatus. Circuit diagrams for the hand telephone sets and coin collectors are shown on foldout pages in sections covering the connections for the specific equipment items.
