

KEY TELEPHONE UNIT
237 TYPE
IDENTIFICATION, CONNECTIONS, AND OPERATION

1. GENERAL

APPLICATION

- 1.001 This Addendum supplements Section 518-310-407.
- 1.002 This Addendum is issued to permit multiline key installations to include add-on conferencing of two central office lines. The schematic shown in Figure 3 on Page 5 should be used for wiring information. Change Para. 2.01 to read as follows:
- 2.001 Provides conferencing by bridging two PBX lines or two central office lines under control of an exclusion or nonlocking key.

Central Office, Manual or Dial PBX Lines Design Features.

(a) Designed for use with a control station telephone set which provides the following features:

Pickup of two PBX lines, or two central office lines which are connected through the same 237 type KTU.

NOTE: When conferencing two central office lines suitable transmission cannot be guaranteed.
