Information is subject to change without notice. Nortel Networks reserves the right to make changes in design or components as progress in engineering and manufacturing may warrant. This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC rules, and the radio interference regulations of the Industry Canada. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case users will be required to correct the interference at their own expense.

Introduction

This document is a global document. Contact your system supplier or a Nortel Networks representative to verify that the hardware and software described is supported in your area.

The purpose of this document is to provide a complete list of all software features available on Meridian 1 systems, and to indicate the source document where descriptive information can be found.

The following documents are acknowledged in this Meridian 1 Feature Listing:

- *Automatic Call Distribution: Feature Description* (553-2671-110)
- *Automatic Call Distribution: Management Commands and Reports* (553-2671-112)
- *Background Terminal Facility: Description* (553-2311-316)
- *Basic and Network Alternate Route Selection: Description* (553-2751-100)
- *Call Detail Recording: Description and Formats* (553-2631-100)
- *Coordinated Dialing Plan: Description* (553-2751-102)
- *DASS: Product Overview Guide* (553-3911-100)
- *DPNSS1: Features and Services Guide* (553-3921-300)
- *DPNSS1: Product Overview Guide* (553-3921-100)
- *Flexible Numbering Plan: Description, Operation, and Administration* (553-2751-105)
- *Meridian Data Services: Description* (553-2731-100)
- *Message Center: Description and Operation* (553-2691-100)
- *Message Registration: Description and Operation* (553-2701-101)

- *Multifrequency Compelled Signaling: Description, Hardware, and Engineering* (553-2861-100)
- *Network ACD: Description and Operation* (553-3671-120)
- *Network Queuing: Description* (553-2751-101)
- *Office Data Administration System: Description and Engineering* (553-2721-100)
