Notice

While reasonable effort was made to ensure that the information in this document was complete and accurate at the time of printing, AT&T cannot assume responsibility for any errors. Changes and/or corrections to the information contained in this document may be incorporated into future issues.

Your Responsibility for Your System's Security

You are responsible for the security of your system. AT&T does not warrant that this product is immune from or will prevent unauthorized use of common-carrier telecommunication services or facilities accessed through or connected to it. AT&T will not be responsible for any charges that result from such unauthorized use. Product administration to prevent unauthorized use is your responsibility and your system administrator should read all documents provided with this product to fully understand the features available that may reduce your risk of incurring charges.

Federal Communications Commission (FCC) Statement

This equipment generates, uses, and can radiate radio-frequency energy and, if not installed and used in accordance with the instruction manual, may cause interference to radio communications. It has been tested and found to comply with the limits for a Class A computing device pursuant to Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference when operated in a commercial environment.

Operation of this equipment in a residential area is likely to cause interference, in which case the user at his/her own expense will be required to take whatever measures may be required to correct the interference.

INTRODUCTION

Overview

This addendum provides information specific to the DEFINITY[®] Communications System Generic 3s (G3s) switch release. Its function is as a supplement to, and is intended to be used in conjunction with, the information already provided in *DEFINITY Communications System Generic 1 and Generic 3i Implementation*, 555-230-650, Issue 1.

DEFINITY Generic 3s is available in two distinct packages:

- Advantage Business Package (ABP)
- Premier Business Package (PBP)

This addendum lists those features, available in Generic 1 and Generic 3i, that are not supported by the Generic 3s release. In addition, features that maybe optionally implemented on a Generic 3s system will be discussed.

In many cases, the only difference between a Generic 3i and Generic 3s feature implementation is the maximum system capacity available for that feature. When using the *DEFINITY Communications System Generic 1 and Generic 3i Implementation* manual to implement the G3s System, refer to the “System Capacities” section of this addendum.

For additional information on DEFINITY Generic 3s, refer to *DEFINITY Generic 3s Feature Description*, 555-230-201ADD2, and *DEFINITY Communications System Genetic 3s System Description*, 555-230-200ADD.

Organization

Note: In the interest of brevity, only G3s specific information is provided in this addendum. Refer to the appropriate section in *DEFINITY Communications System Generic 1 and Generic 3i Implementation*, 555-230-650, Issue 1, when implementing features on the G3s System.

The other chapters of this addendum areas follows:

DEFINITY Generic 3s Capabilities — An overview of the capabilities and features of the G3s BBP and ABP packages.

System Capacities — A table that lists maximum feature capacities for Definity Generic 1.1, Generic 3i, Generic 3s ABP and Generic 3s PBP.

DEFINITY Generic 3s Capabilities

Overview

This chapter outlines the capabilities of the G3s Advantage Business Package (ABP) and G3s Premier Business Package (PBP) in relation to the G3i system.

Advantage Business Package

The DEFINITY Generic 3s Advantage Business Package (ABP) is a derivative of the DEFINITY Generic 3i System providing support for up to 200 total stations and 50 trunks.

With the exception of the features listed below, all standard features that are available with G3i are also supported by G3s ABP, however, the capacity limits for some features are reduced from the G3i levels. Refer to Chapter 2, "System Capacities" for a complete listing of all capacity limits.

- Features not available with G3s ABP:

Note: Features that are optional to G3i (CallVisor™ ASAI and Centralized Attendant Service, for example) are not supported in the G3s ABP.

- Administered Connections
- Common Control Duplication Option
- Expansion Port Network (EPN) Support
- Multi Carrier Cabinet (MCC) support

Note: G3s supports only the Enhanced Control Cabinet. When conducting the System survey, refer to Table 1-A for the number of port slots available in G3s.

TABLE 1-A. Single-Carrier Cabinets

CABINET CONFIGURATIONS	NUMBER CABINETS	PORT CIRCUIT PACK SLOTS*
G3s	1	16
PPN	2	34
Without	3	52
Duplication	4	70

* Number represents all universal port slots in cabinet (that is, does not exclude slots associated with Tone Clocks, and so on).

In addition to the standard features provided with G3s ABP, there are several optional feature packages that may be purchased to enhance the capabilities of the ABP System. The following option packages may be selected individually or in any combination:

Note: Except where noted, the features that make up the various option packages are not available separately.

- **Authorization Codes Option**

Adds the Authorization Codes feature to G3s ABP.

Note: The Automatic Route Selection (ARS) Option must be purchased before Authorization Codes can be implemented on G3s ABP.

- **Automatic Route Selection (ARS) Option**

Adds Automatic Route Selection to G3s ABP.

Note: This option must be purchased to activate the Authorization Codes Option.

- **Basic Call Center Option**

The Basic Call Center Option consists of the features listed below.

- Automatic Call Distribution (ACD)
- Basic Call Management System (BCMS)
- System Measurement and Traffic Reports (also available separately)

Note: If the System Measurement and Traffic Reports feature is not purchased (either separately, as shown below, or as part of the Basic Call Center Option), the Security Violations Measurement Report is still available on the System.

- **System Measurement and Traffic Reports Option**

Adds the ability to generate System Measurement and Traffic Reports on G3s ABP.

Note: If the System Measurement and Traffic Reports Option is not purchased, the Security Violations Measurement Report is still available on the System.

- **Voice Mail Application Support Option**

The Voice Mail Application Support Option consists of the features listed below.

- Leave Word Calling (LWC)
- Linked Call Coverage Paths

Note: The Voice Mail Application Support Option is activated when an AT&T voice processing adjunct is purchased.

Premier Business Package

The DEFINITY Generic 3s Premier Business Package (PBP) supports all features that are available with the Advantage Business Package. In addition, features that are optional to G3i (CallVisor ASAI, and Centralized Attendant Service, for example) are also optionally available in the G3s PBP, however, the capacity limits for some features are reduced from the G3i levels. Refer to Chapter 2, "System Capacities" for a complete listing of all capacity limits.

Certain features are not supported by G3s PBP, these features are listed below.

- Features not available with G3s PBP:
 - Common Control Duplication Option
 - Expansion Port Network (EPN) support
 - Multi Carrier Cabinet (MCC) support

Note: G3s supports only the Enhanced Control Cabinet. When conducting the System survey, refer to Table 1-A for the number of port slots available in G3s.

SYSTEM CAPACITIES

Overview

This section provides a table that compares the maximum system capacities for the following DEFINITY Communications System configurations:

- G1.1
- G3s Advantage Business Package (ABP)
- G3s Premier Business Package (PBP)
- G3i

Note: Not all maximum capacities listed in the following table can be reached simultaneously with all versions or all configurations of the System.

Maximum Capacities

TABLE 2-A. Maximum System Parameters for Hardware and Software Items

Item	G1.1	G3s		G3i
		ABP	PBP	
Abbreviated Dialing (AD)				
AD Lists Per System	1,600	200	200	1,600
AD List Entry Size	24	24	24	24
AD Entries Per System	8,000	1,000	1,000	10,000
Enhanced List (System List)	1	NA	1	1
Maximum entries	1,000	NA	1,000	1,000
Group Lists	100	100	100	100
Maximum entries	90	90	90	90
Group lists/extension	3	3	3	3
System List	1	1	1	1
Maximum entries	90	90	90	90
Personal Lists	1,600	200	200	1,600
Maximum entries	10	10	10	10
Personal lists/extension	3	3	3	3
Applications Adjuncts				
CallVisor ASAI Adjuncts	NA	NA	4	8
Asynchronous Links (EIA 232C)	5	5	5	5
SMDR Output Devices	2	2	2	2
Journal/System Printer	2/1	2/1	2/1	2/1
Property Management Systems	1	1	1	1
BX.25 Physical Links	8	4	4	8
Application Processors (that is, 3B2-MCS)	1	1	1	1
AUDIX™ Adjuncts	1	1	1	1
CMS Adjuncts	1	1	1	1
ICM Adjuncts				
ISDN Gateway	1	NA	1	1
BX.25 Processor Channels	64	64	64	64
Hop Channels	64	64	64	64

TABLE 2-A (continued).
Maximum System Parameters for Hardware and Software Items

Item	G1.1	G3s		G3i
		ABP	PEP	
Attendant Service				
Attendant Consoles (day/night)	6/1	6/1	6/1	6/1
Attendant Console 100s Groups/Attendant	20	20	20	20
Attendant Control Restriction Groups	64	64	64	64
Centralized Attendant Service				
Release Link Trunks at Branch	99	NA	99	99
Release Link Trunk Groups at Branch	1	NA	1	1
Release Link Trunks at Main	400	NA	100	400
Release Link Trunk Groups at Main ¹	99	NA	32	99
Other Access Queues				
Maximum Number of Queues	1	1	1	1
Maximum Number of Queue Slots ²	50	30	30	50
Queue Length	30	30	30	30
Switched Loops/Console	6	6	6	6
ARS/AAR				
AAR Patterns	254	NA	40	254
ARS Patterns	254	20	40	254
ARS/AAR Table Entries (NPA, NXX, RXX, HNPA, FNPA)	NA	2,000	2,000	2,000
Choices per RHNPA Table	12	12	12	12
Digit Conversion Entries	180	300	300	300
Digits Deleted ARS/AAR	11	18	18	18
Digits Inserted for ARS/AAR	36	36	36	36
Entries in HNPA & RHNPA Tables	800	1,000	1,000	1,000
FRLs	8	8	8	8
Inserted Digit Strings ³	NA	450	450	1,200
Patterns for Measurement				
Shared Patterns for Measurement	20	20	20	20
RHNPA Tables	32	32	32	32
Routing Plans	8	8	8	8
Toll Tables	4	32	32	32
Entries per Toll Table	800	800	800	800
Trunk Groups in an ARS/AAR pattern	6	6	6	6
UDP (Entries)	240	NA	240	240
TOD Charts	8	8	8	8

1. The number of release link trunk groups at Main is the same as the number of trunk groups in the system.
2. "Maximum number of queue slots" is referred to as "emergency access queue length" in G3i.
3. This is the number of available 12-character inserted-digit-strings available for AAR/ARS preferences.

TABLE 2-A (continued).
Maximum System Parameters for Hardware and Software Items

Item	G1.1	G3s		G3i
		ABP	PBP	
CallVisor ASAI				
Active Controlling Associations	NA	NA	250	2,000
Call Controllers per Call	NA	NA	1	1
Call Monitors per Call	NA	NA	14	14
Extension Controllers per Station Domain	NA	NA	2	2
Maximum Simultaneous Call Classifiers	NA	NA	40	40
Number of ASAI Links	NA	NA	4	8
Notification Requests	NA	NA	50	170
Simultaneous Active Adjunct Controlled Calls	NA	NA	75	300
Switch to Adjunct Associations	NA	NA	127	127
Authorization				
Authorization Codes	5,000	1,500	1,500	5,000
Classes of Restriction	64	64	64	64
Classes of Service	16	16	16	16

Coverage Points in a Path	3	3	3	3
Maximum Users/Coverage Path ⁸	2,900	500	500	2,900
Members per CAG	8	8	8	8

4. The number of call appearances is the sum of the primary and bridged appearances; at most 10 can be primary.
5. Dose not apply to conferencing.
6. Small systems refer to the 2-carrier cabinet systems that are no longer sold to new customers.
7. MCC includes Medium Cabinet.
8. Maximum number of users per coverage path equals the number of dial plan extensions (which includes hunt groups, TEGs, and so on).

TABLE 2-A (continued).

Simultaneous SM Sessions	5	3	3	5
Printer Queue Size	50	50	50	50

19. Only port slots are included in this count. For example, there are 100 port slots per MCC EPN cabinet of which one is dedicated for the Tone/Clock circuit pack. There may be other service circuits required which would further reduce the number of port slots available. In G3 carriers, a 21st slot may be equipped with service boards that do not require tip & ring connections.

Trunk Groups in the System	99	16	32	99
Trunk Members in a Trunk Group	99	50	99	99
Trunk in System (Incl. Remote Access)	400	50	100	400
With Hospitality Parameter Reduction	50	NA	50	50

20. 512 time slots per port network

21. 483 time slots for voice & data per port network.

22. Only 1 PI circuit pack is supported in the G3s configuration (Enhanced Control Cabinet), and therefore a total of 4 physical links (used for BX.25 or PRI) is available.

23. In the G3i configuration, 2PI circuit packs can be supported in the MCC, and therefore a total of 8 physical links (used for BX.25 or PRI) are available. Since the SCC and Enhanced Control Cabinet can only support 1 Pi circuit pack, a total of 4 physical links (used for BX.25 or PI) is available in the SCC G3i and G3s configurations.

TABLE 2-A (continued).
Maximum System Parameters for Hardware and Software Items

Item	G1.1	G3s		G3i
		ABP	PBP	
Voice Terminals				
Associated Data Modules (for example, DTDMs)	800	75	75	800
BRI Stations ²⁴	NA	50	50	1,000
Digital Stations ²⁵	712	200	200	1,600
Display Stations	500	200	200	1,600
Stations ²⁶	1,600	200	200	1,600
Station Button Capacity (K Units) ²⁷	NA	102.6	102.6	547.2

24. All BRI stations can be display stations.

25. All digital stations can be 7406D stations with display.

26. Including extensions administered without associated hardware.

27. "Station Button Capacity (K units)" replaces "Maximum Button Modules" (from pre-G3i).

The following examples show how these units can be used. the assumption is that only 3 call appearances are assigned to the sets (except analog sets which have no call appearances).

- Anlog sets (for example 7104A): G3s, G3i = 62 units
- Digital sets with 10 buttons (for example 7403D): G3s, G3i = 102 units
- Digital sets with 34 buttons, without display (for example 7405D): G3s, G3i = 342 units
- Digital sets with 34 buttons, with display (for example 7405D): G3s, G3i = 472 units
- BRI sets with 17 buttons, with display (for example 7506D): G3s, G3i = 250 units

The station button capacity can support all stations equipped as digital sets with 34 buttons, without display (for example 7405D), or all 7406D with display. For example, a total of (342x 1600) units = 547,200 units for G3i.
