# Documentation Roadmap

## Using Your Documentation

All of the DEFINITY ProLogix<sup>®</sup> Solutions<sup>™</sup> Release 3 documentation is contained on this Documentation CD. This CD also contains DEFINITY Enterprise Communications Server (ECS) Release 8 documentation and GuestWorks Issue 6 documentation. Note that DEFINITY ProLogix Solutions Release 3 uses the same software as DEFINITY ECS Release 8.

The following documents contain overview, installation, maintenance, and administration information for your DEFINITY system. Additionally, there are other useful documents on this CD regarding adjuncts, call center, messaging, PC applications, operations, security, and telephones. You'll find an alphabetical listing of documents, as well as product categories on the ProLogix documents menu of this CD. Simply click on the category, and then click on the document you want to see. You can print a document (or certain pages of a document), search within a document, or search for a term throughout the entire library of documents on the CD. Click here to see [how to search](#).

- **DEFINITY ProLogix Solutions Release 3 Overview**

Provides an overview of the features, components, and capabilities of DEFINITY ProLogix Solutions, including the system, telephones, adjuncts, messaging, call center, wireless, computer telephony integration, telecommuting, system administration, and network solutions.

- **DEFINITY ProLogix Solutions What's New in Release 3**  
Provides a brief summary of the new features and enhancements included in Release 3.
- **DEFINITY ECS Release 8 Installation and Test for Compact Modular Cabinets**  
For trained installation technicians, this book provides procedures to install, upgrade, or make additions to a DEFINITY system.
- **DEFINITY ECS Release 8 Maintenance for Release 8csi**  
For maintenance technicians, this book contains the information needed to monitor, test, and maintain a DEFINITY system and covers many of the faults and troubles that can occur.
- **DEFINITY ECS Release 8 Administrator's Guide**  
For system administrators, this book provides an overall reference for planning, operating, and administering a DEFINITY system.
- ***Guide Builder*<sup>TM</sup> Software for DEFINITY ECS Telephones**  
A software application that allows you to create customized user documentation for your telephone(s).
- ***Guide Builder*<sup>TM</sup> Software for AUDIX Systems**  
A software application that allows you to create customized documentation for your messaging system.

- **DEFINITY System's Little Instruction Books**

**Basic Administration** provides step-by-step procedures for performing basic switch administration tasks like managing phones, features and routing outgoing calls.

**Advanced Administration** provides step-by-step procedures for adding trunks, hunt groups, writing vectors, and recording announcements.

**Basic Diagnostics** provides step-by-step procedures for baselining your system, solving common problems, reading alarms and errors, and using features to troubleshoot your system.

**Note:** You should have also received the DEFINITY System's Little Instruction Box, containing a hard copy of each of the three little instruction books, packaged inside a box for easy storage on your bookshelf.

## Training CDs

In addition to one seat in the 5-day System Administration class (BTC 158H), you should have received the following training CDs. See the CD inserts (inside front cover of jewel case) for installation instructions. We recommend you create a desktop icon for each of these CD programs for easy reference.

- **DEFINITY Automatic Route Selection (ARS) Training CD**

This self-paced training program is for end users with system administration responsibilities, and contains training modules on automatic route selection, presented in a multimedia and interactive testing environment.

- **DEFINITY Administrator Knowledge Tool CD**

A combination of documentation, training, and online help, this CD is a comprehensive, integrated basic system administration and basic DEFINITY system administration support tool—this tool helps you become self supportive in handling day-to-day administration tasks.

## Ordering Information

To order paper versions of documents contained on this CD, provide the document numbers for the documents you want to order and contact:
