1. GENERAL

1.01 This section contains specific lubrication procedures for the 28 reperforator and tape printer set enclosures.

- (a) Receive-only reperforator set cover — no lubrication required.
- (b) Receive-only miniaturized typing reperforator set cover.
- (c) Keyboard typing reperforator set cover.
- (d) Keyboard tape printer set cover.
- (e) Reperforator or tapeprinter table — no lubrication required.

1.02 This section has been revised to include change in title, recent engineering changes and additions, and to rearrange the text so as to bring the section generally up-to-date. Since this is an extensive revision, marginal arrows ordinarily used to indicate changes have been omitted.

1.03 Specific lubrication information is indicated by a line drawing and descriptive text. The symbols in the text indicate the following directions:

- O1 Apply one drop of oil.
- O2 Apply two drops of oil.
- O3 Apply three drops of oil.
- G Apply thin coat of grease.
- SAT Saturate (felt oilers, washers, wicks) with oil.

1.04 Use TP88970 (KS7470) oil at all locations where the use of oil is indicated. Use TP88973 (KS7471) grease on all surfaces where grease is indicated.

1.05 All spring wicks and felt oilers should be saturated. The friction surfaces of all moving parts should be thoroughly lubricated. Over lubrication, however, which will permit oil or grease to drip or be thrown on other parts, should be avoided. Special care must be taken to prevent any oil or grease from getting between electrical contacts.
