

SYNCHRONOUS "DATASPEED\*" 40/4  
MAXI-CLUSTER AND MINI-CLUSTER STATION ARRANGEMENTS  
DISASSEMBLY/REASSEMBLY AND PARTS

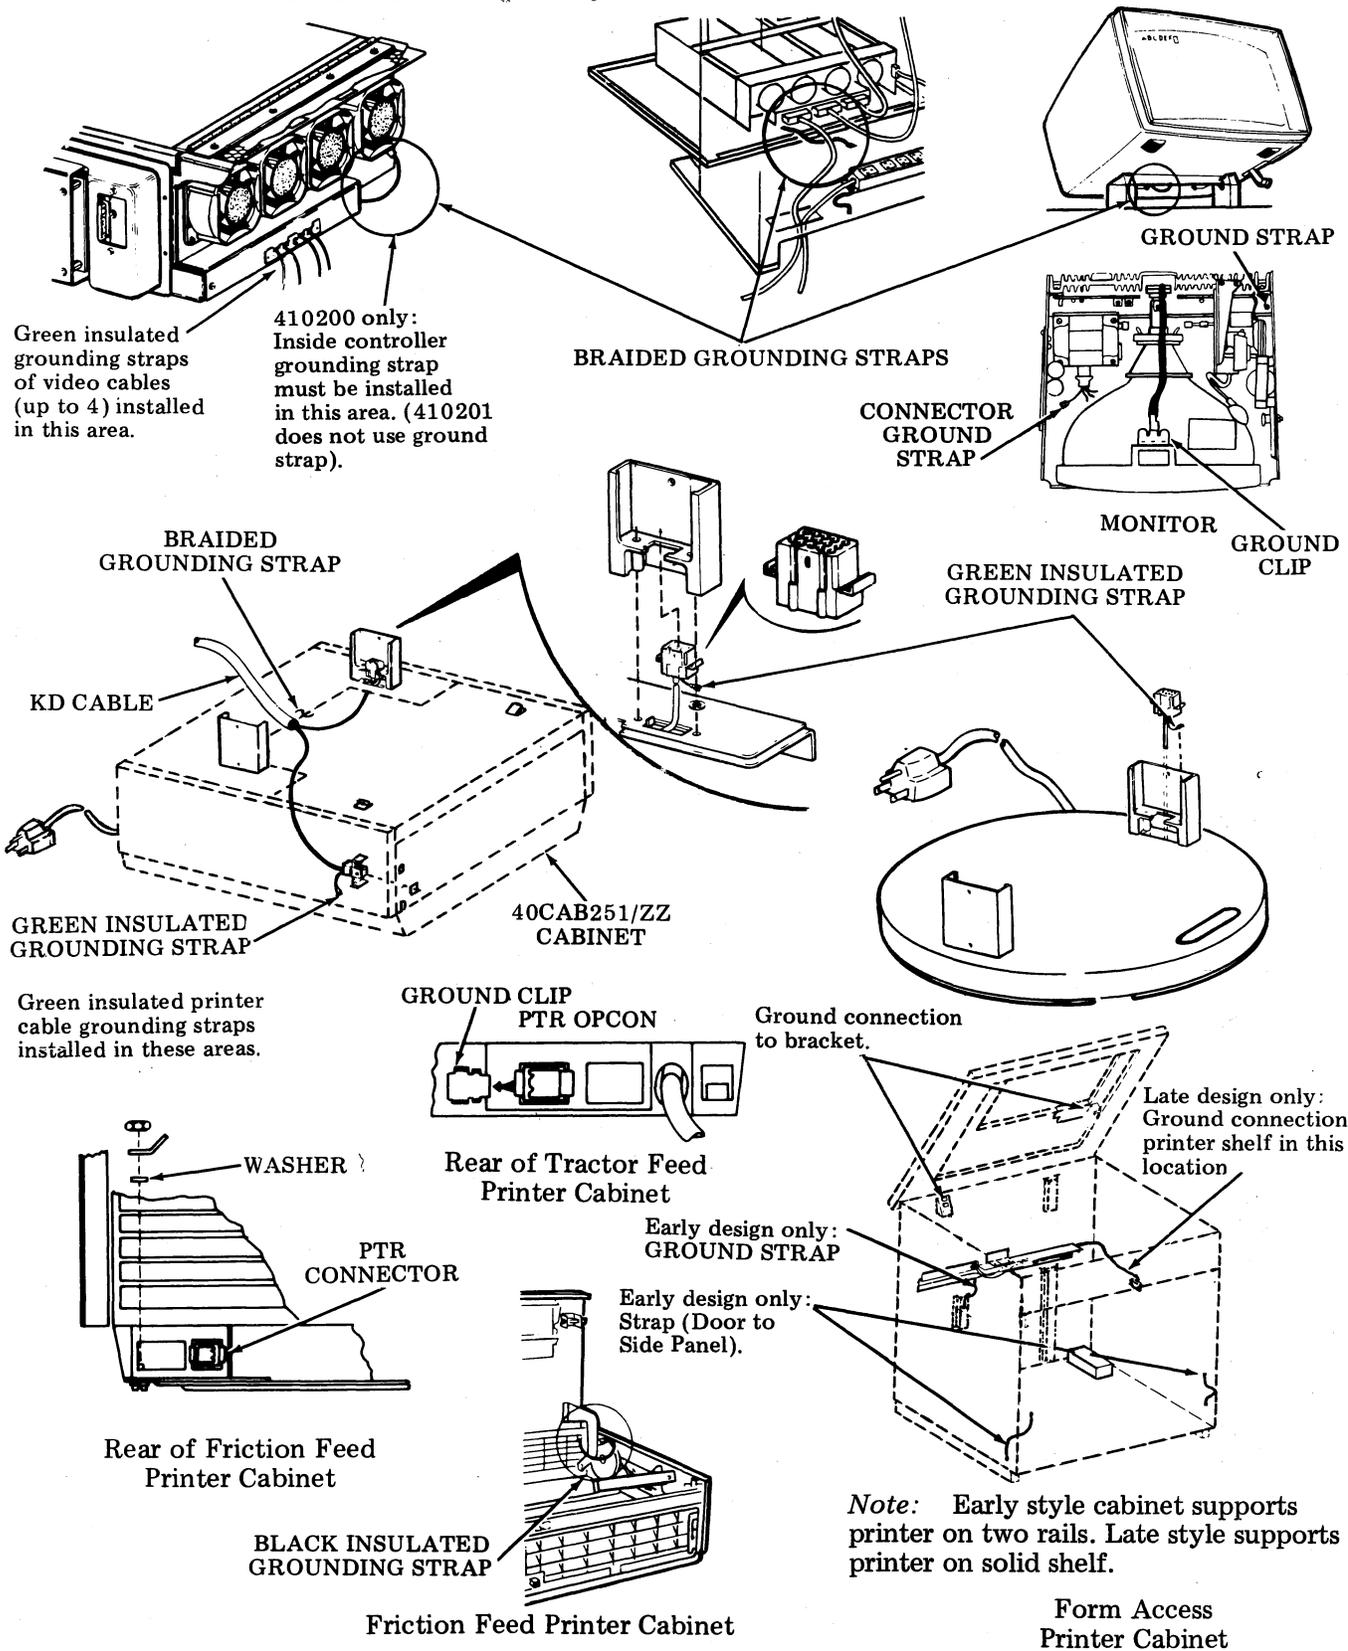

CONTENTS	PAGE	1. GENERAL
1. GENERAL .....	1	1.01 This section contains all necessary information on the removal and replacement of various components of DATASPEED 40/4 Stations. This section also includes locations of test switches and indicators used in trouble analysis and testing of the station.
2. DISASSEMBLY/REASSEMBLY....	3	1.02 This section is reissued to add coverage for the removal and replacement of the monitor and late design support latch. This issue also adds coverage for the new forms access printer cabinet.
MONITOR .....	3	1.03 Information on the 40KDA101 keyboard display amplifier is given in Section 582-200-212.
OPCON .....	3	1.04 Abbreviations used in this section are defined in Section 582-200-101.
PRINTERS .....	5	1.05 To disassemble or reassemble parts (or units) of this section, the following tools (or equivalents) are required:
A. Friction Feed Printer .....	5	Screwdriver, 1/8" blade
B. Tractor Feed Printer (80 or 132 Column) .....	6	Screwdriver, 1/4" blade
C. Forms Access Printer and Cabinet .....	7	Socket wrench, 1/4"
PEDESTALS AND CABINETS.....	8	Socket wrench, 5/16"
CIRCUIT CARDS .....	8	Open-end wrench, 1/4"
40PSU102 POWER SUPPLY.....	9	Static ground strap, 346392 (required only if circuit cards are handled)
CONTROLLER.....	10	Terminal extractor, 402840
A. Ventilation Assembly .....	11	
B. Interconnection Module .....	12	
C. Back Panel .....	13	
D. Cables .....	16	
3. PARTS .....	17	
INDEX OF REPLACEABLE PARTS .....	21	

*Note:* When ordering replaceable components, unless otherwise specified, prefix each part number with the letters "TP" (ie, TP410055).

\*Registered Trademark of AT&TCo.

1.06 Grounding Strap Locations

*Note:* Remove strapping only when necessary.

2. DISASSEMBLY/REASSEMBLY

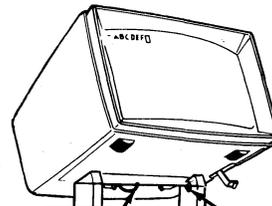

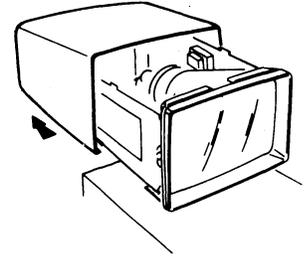

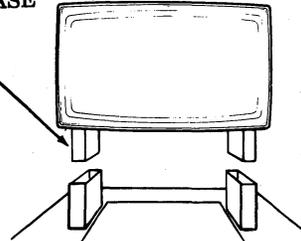

*Caution: Remove all power from the set before performing any component replacement or conversions. This does not apply to cover removal for access to test switches, or to power on adjustments of the monitor.*

MONITOR

- 2.01 To remove the monitor, see ① .  
To remove only the monitor housing, see ② .

- ① Removal of entire monitor unit from set:  
Grasp monitor by sides near supports (late design — on rear of left support press latch release) and simply lift up. Electrical cable connectors are part of support assembly.
- ② Removal of monitor housing:  
Tilt monitor back and disengage latch. Early design — release by hand. Late design — insert a thin blade screw driver into cutout in latch and push to the right to release. Slide housing back partially. Position monitor to its normal position making sure it locks in that position. Remove housing completely.

LATE STYLE  
LATCH RELEASE

WEAR  
SAFETY  
GLASSES

LATCH RELEASE

TILT RELEASE  
(When Housing is  
Removed)

*Warning: A latch on the rear of the left leg of monitors manufactured after May 1979, must be released to be able to lift off monitor.*

*Danger: When replacing (installing) the monitor keep your hands clear of the bottom of the monitor posts to avoid injury.*

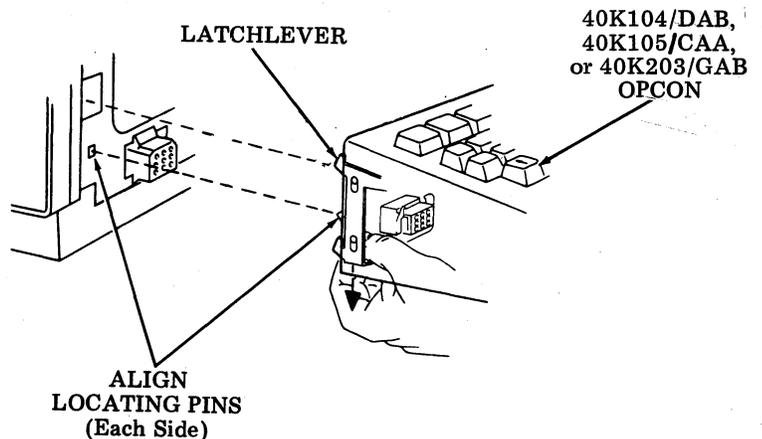

- 2.02 To replace the monitor, (see Danger and Warning) reverse the removal procedures of 2.01. For further disassembly of the monitor, refer to Section 582-213-701.

OPCON

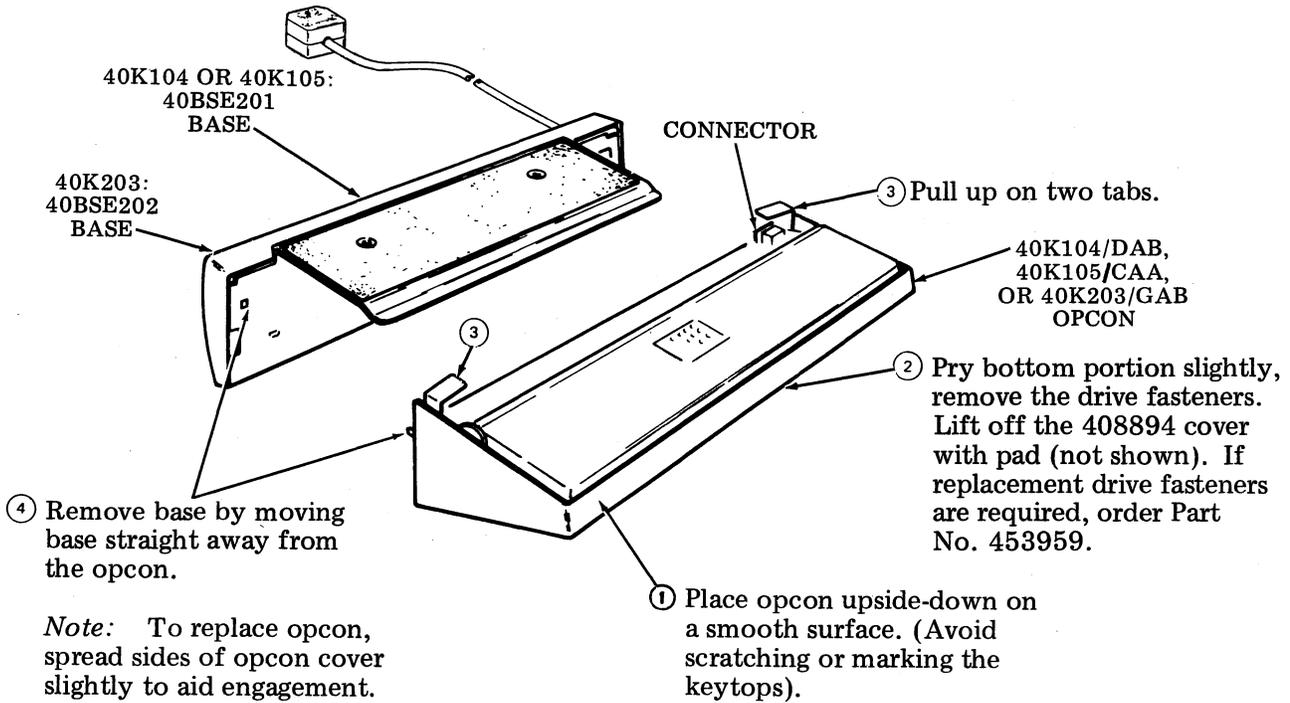

- 2.03 To remove the opcon use the appropriate steps given below or on following page.

Attached KD

- ① Place thumb on inward tab of opcon (both sides).
- ② Press downward into unlatch position (each side).
- ③ Remove opcon by pulling straight away from the cabinet.

Free-Standing KD

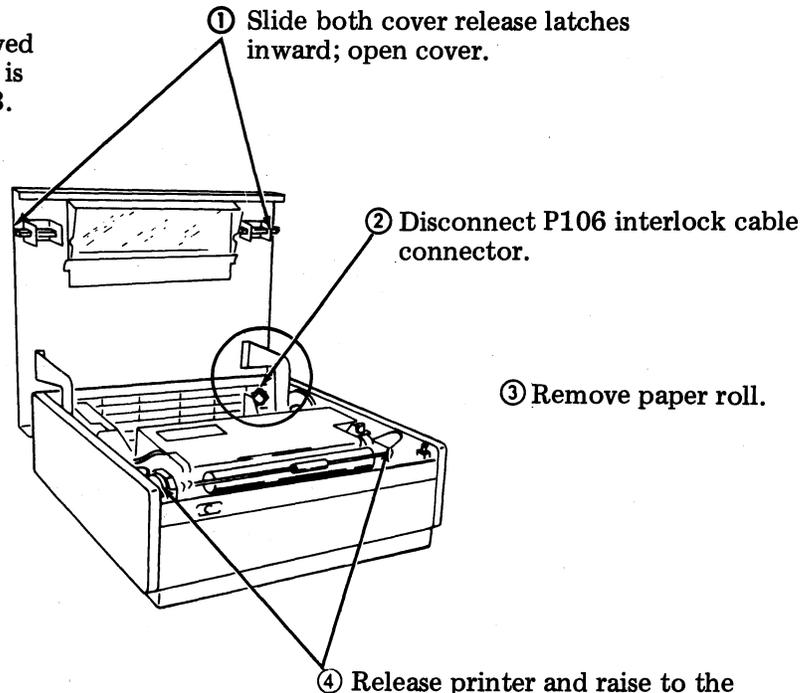

2.04 To replace the opcon, reverse the removal procedures of 2.03. When replacing opcon, make sure locating pins are fully engaged before pushing latchlevers into locked position. For further disassembly of opcon, refer to Section 582-213-701.

## PRINTERS

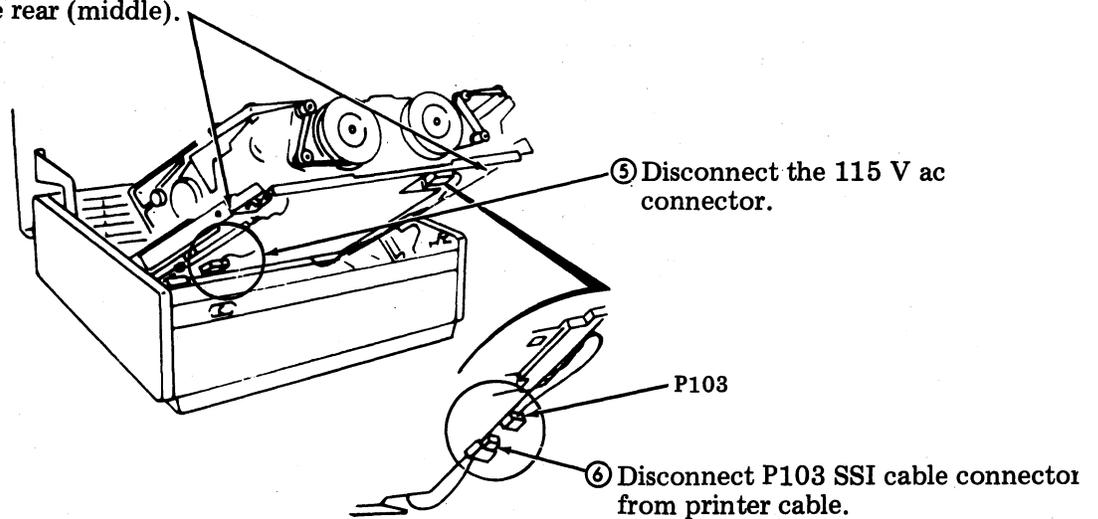

## A. Friction Feed Printer

2.05 To remove the entire printer assembly:

*Note:* The circuit card can be removed after Step 4 of disassembly. If printer is not being removed omit Steps 2 and 3.

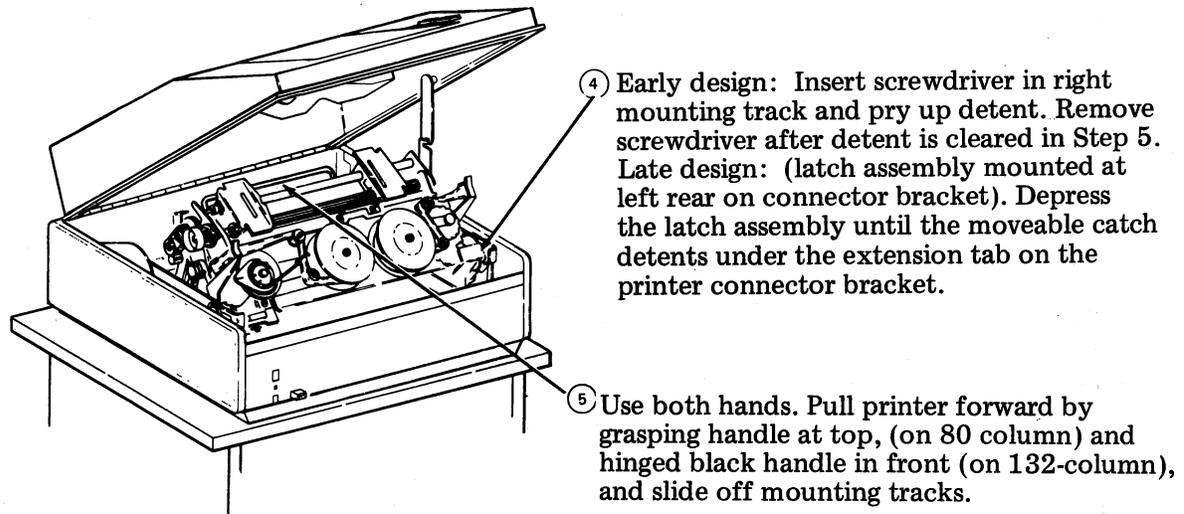

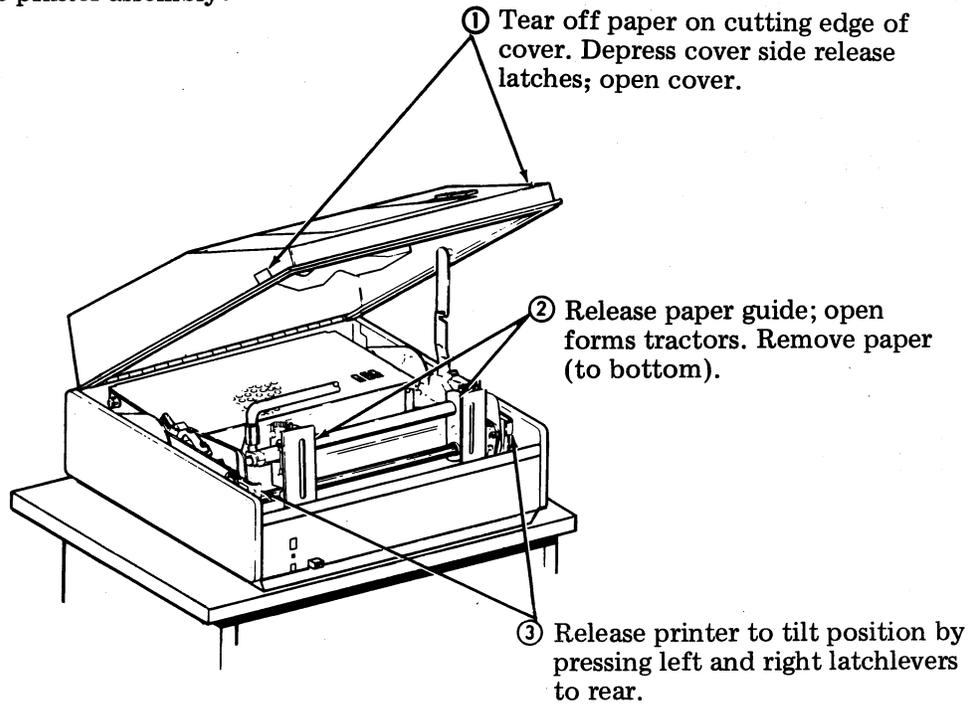

⑦ Use both hands. Release (push in) the printer slide detents and pull the printer out by grasping it by the frame (front bottom) then also by the rear (middle).

2.06 To replace the printer, reverse the removal procedures of 2.05. For further disassembly of printer and printer cabinet, refer to Section 582-210-702.

B. Tractor Feed Printer (80 or 132 Column)

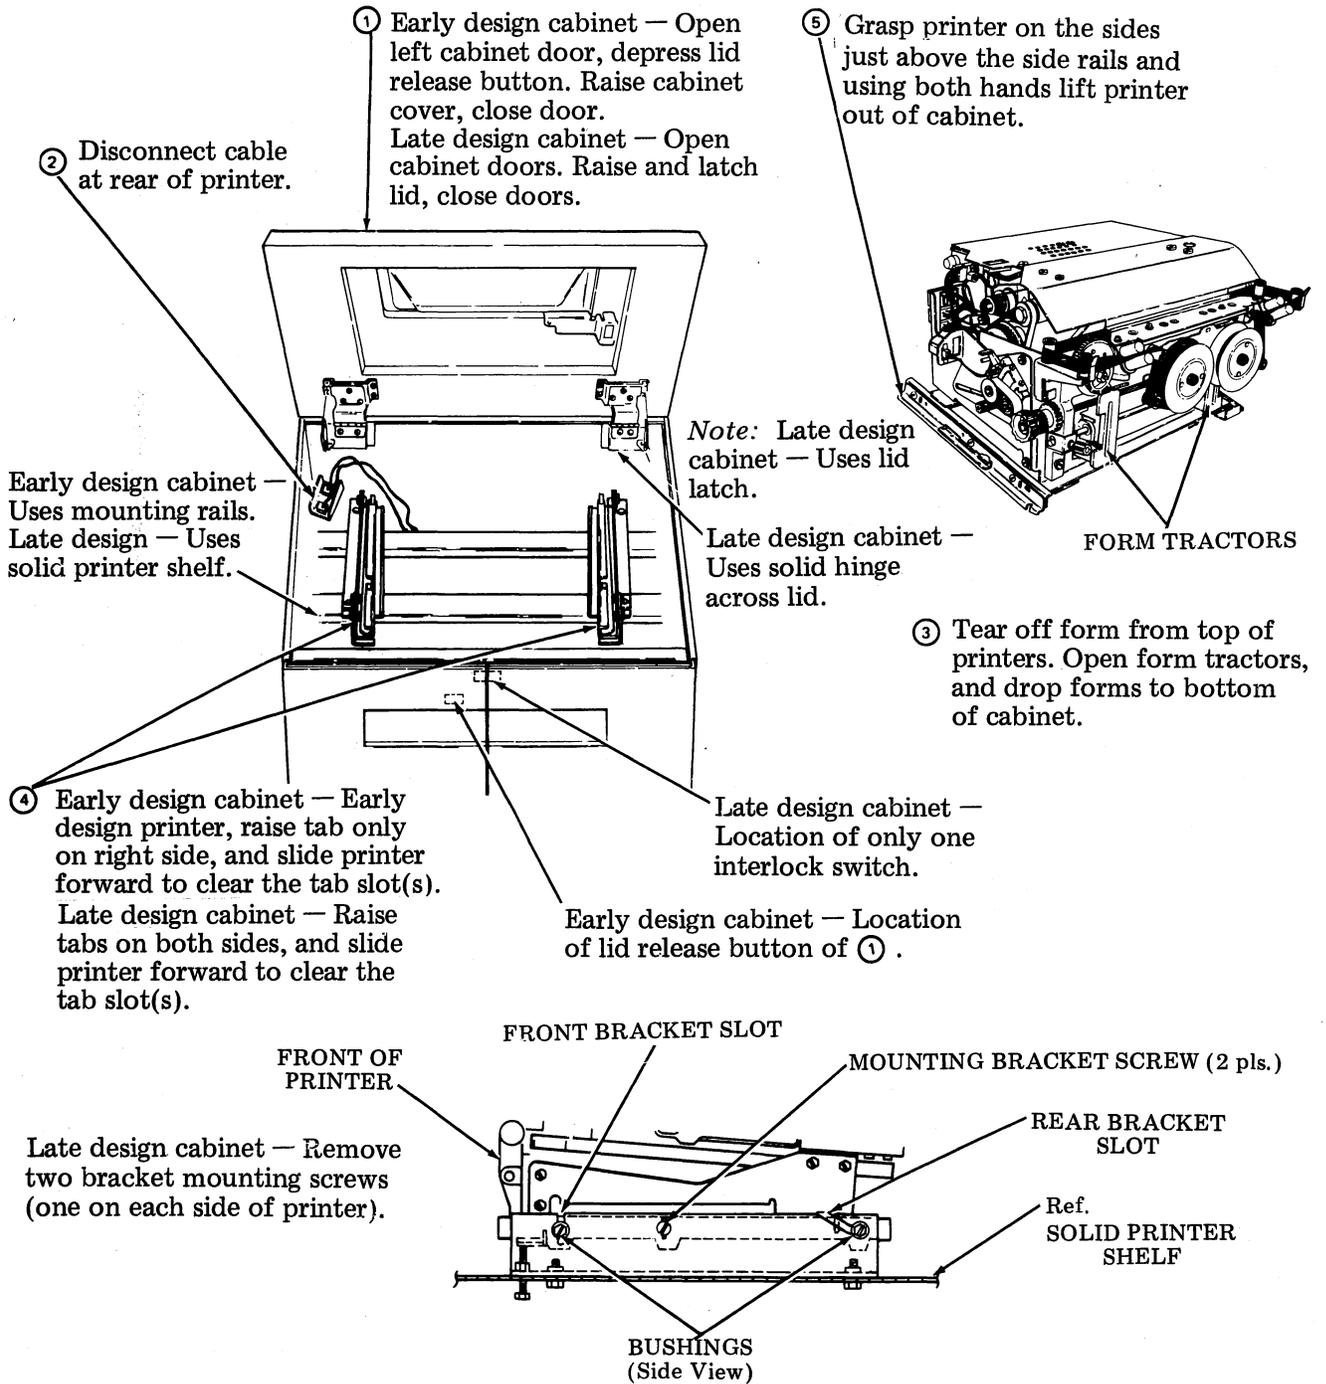

2.07 To remove the entire printer assembly:

2.08 To replace the printer, reverse the removal procedures of 2.07. For further disassembly, refer to Section 582-210-702 for printers and Section 582-212-700 for cabinets.

C. Forms Access Printer

2.09 To remove the entire printer assembly.

FORMS ACCESS PRINTER CABINET

2.10 To replace the printer, reverse the procedures in 2.09. Late design cabinet and printer with modified frame — grasp printer as in Step 5, lower printer into cabinet mounting shelf and seat bushings in bracket slots. Install the two mounting bracket screws (one on each side). For further disassembly refer to Section 582-210-702 for printer and Section 582-212-700 for cabinet.

## SECTION 582-200-701

### PEDESTALS AND CABINETS

2.11 Refer to Section 582-212-700 for assembly or disassembly of a pedestal or cabinet.

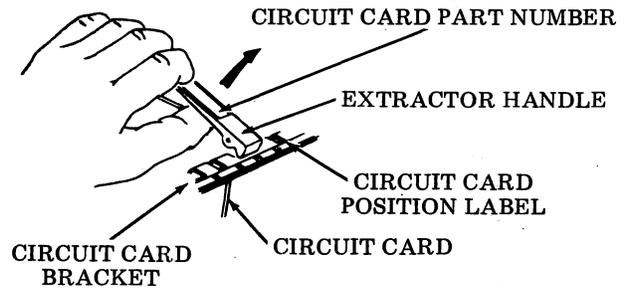

### CIRCUIT CARDS

*Note:* The required circuit cards and their options and locations are given in Section 582-200-201.

2.12 To remove the controller circuit card:

Lift up on extractor handles  
and lift straight up.

*Caution:* Wear 346392 static discharge strap when removing circuit cards. See Section 582-200-201, 1.04 Warnings 1, 2 and 3.

2.13 To replace the controller circuit card:

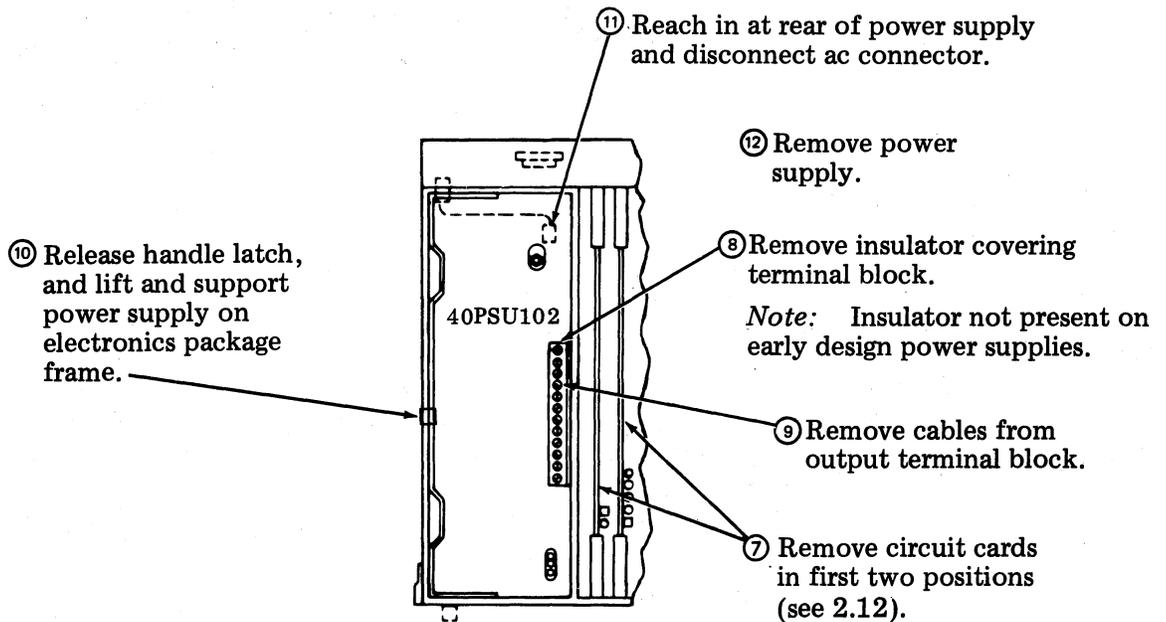

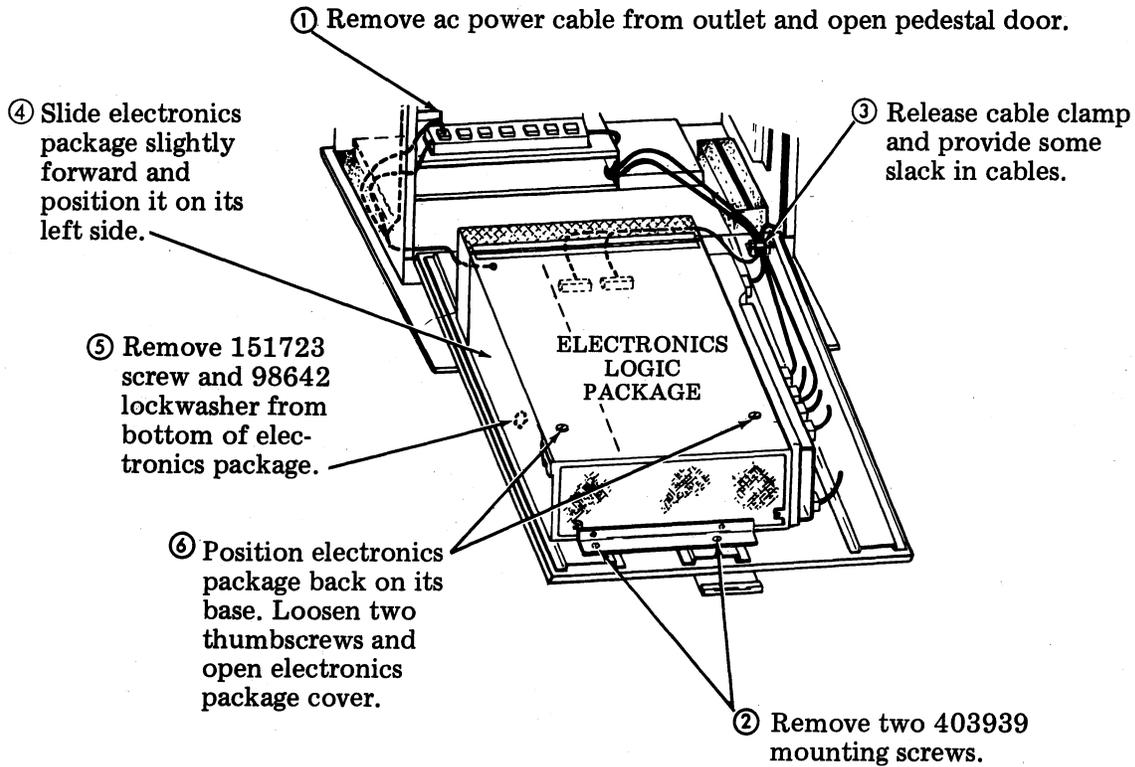

- ① Check that card is proper for location (see Note above).
- ② Check that pins on card are straight (not bent) by sighting down the two rows of pins.

*Warning:* Attempting to insert a card with bent pins into the 410200 or 410201 back panel may result in damaging the back panel or the card.

- ③ Check that the option switches are set to the correct setting (refer to the Controller Arrangement Form on the underside of the controller cover — should be present before installation). Refer to the above Note.
- ④ Place card in slot, then depress until card is fully seated.

40PSU102 POWER SUPPLY

2.14 To remove the power supply:

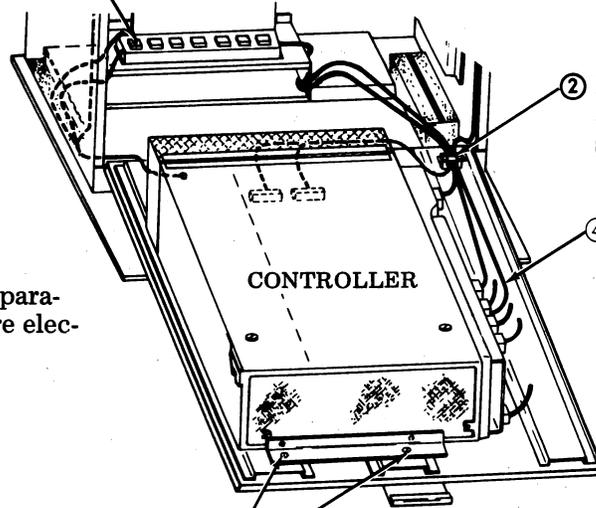

2.15 To replace the power supply, reverse the removal procedures of 2.14.

CONTROLLER

2.16 To remove the controller (see Note 1):

- ① Turn off pedestal power switch, open pedestal door, and unplug controller ac power cord from ac outlet.

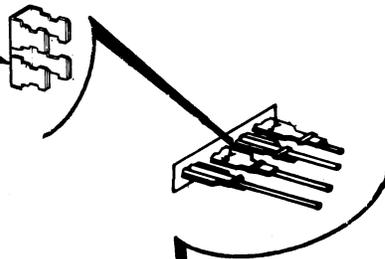

- ② Release cable clamp and provide some slack in cables.

- ④ Insure that all cables are properly marked then disconnect SSI cable(s) and data set or data auxiliary set cable if present.

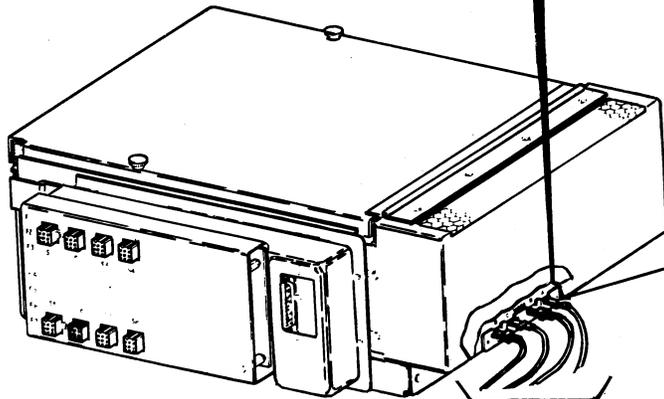

- ③ Remove two 403939 mounting screws from door.
- ⑤ Slide controller slightly forward to disengage rear mounting tabs and turn controller (90°) for access to rear.

Note 1: "Controller" in this paragraph is used to mean the entire electronics package.

192009  
GROUND  
LUG

Note 2: During reassembly, strain reliefs of video connectors to A and C must be facing up and reliefs to B and D must be facing down. Connectors of green wires must be connected to a terminal on the ground lugs. (See Section 582-200-201 to select which controller connector(s) to use.)

- ⑥ DCC, MCC: Remove connectors of green wires from ground lugs. Remove two 198670 screws. Remove 405210 plate and D I/O cable(s).

- ⑦ Remove controller from pedestal.

Note 3: A green wire is part of each D I/O cable.

2.17 To replace the controller, reverse the removal procedures of 2.16. See Note 1.

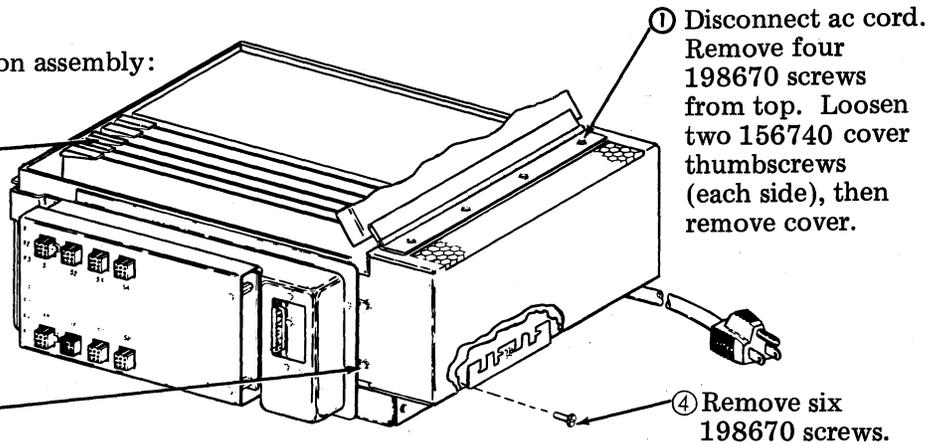

A. Ventilation Assembly

2.18 To remove the ventilation assembly:

② Remove circuit cards from electronics package (see 2.12).

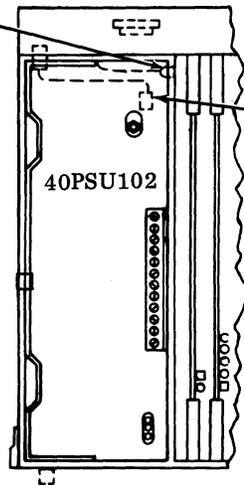

③ Loosen four 156720 screws. Remove 408007 shroud from controller.

⑤ Disconnect ground strap from back panel (circuit card).

⑥ Disconnect ac power connector from power supply.

⑦ Remove ventilation assembly from controller.

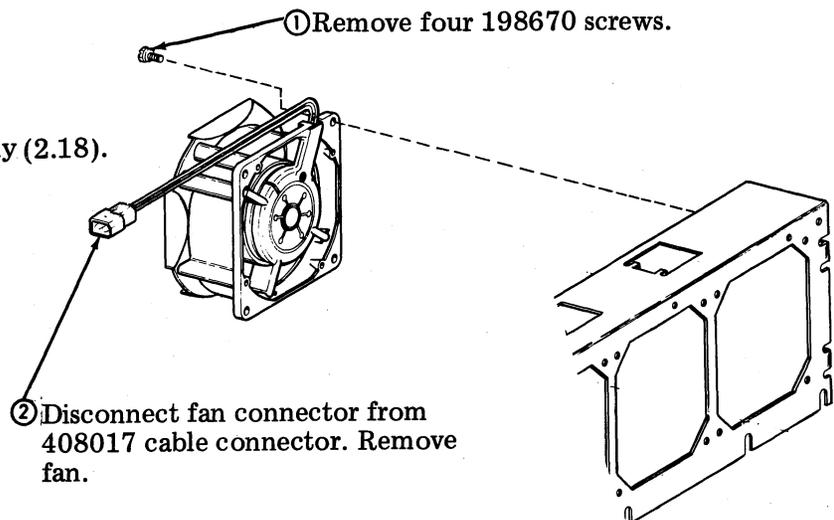

2.19 To replace the ventilation assembly, reverse the removal procedures of 2.18.

408015 Fan

2.20 To remove a fan:

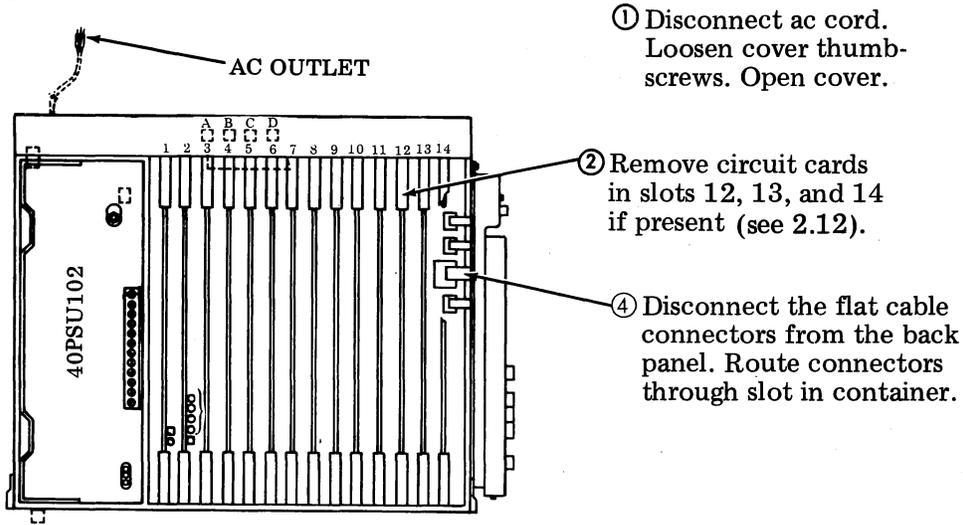

- Remove ventilation assembly (2.18).

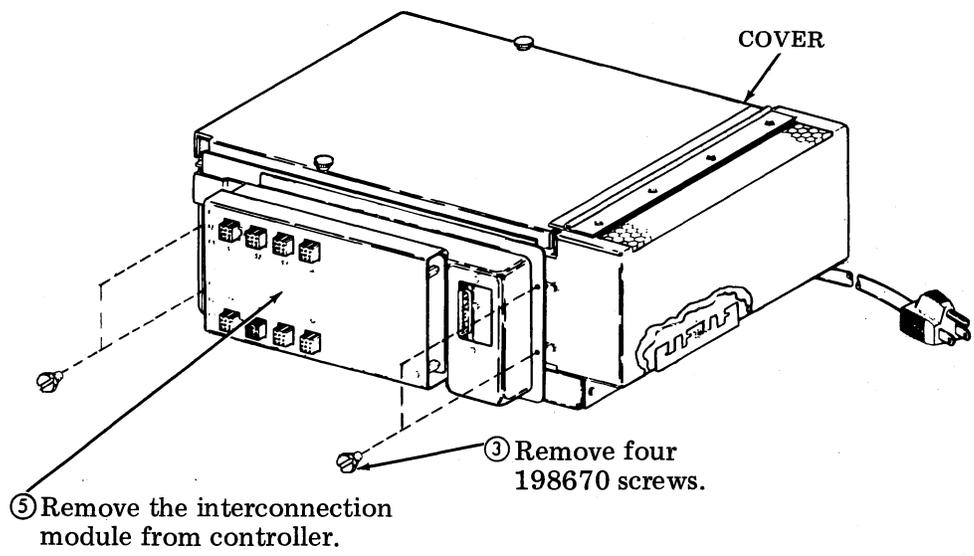

2.21 To install a fan, reverse the removal procedures of 2.20.

B. Interconnection Module

2.22 To remove the interconnection module:

- ① Disconnect ac cord. Loosen cover thumb-screws. Open cover.
- ② Remove circuit cards in slots 12, 13, and 14 if present (see 2.12).
- ④ Disconnect the flat cable connectors from the back panel. Route connectors through slot in container.

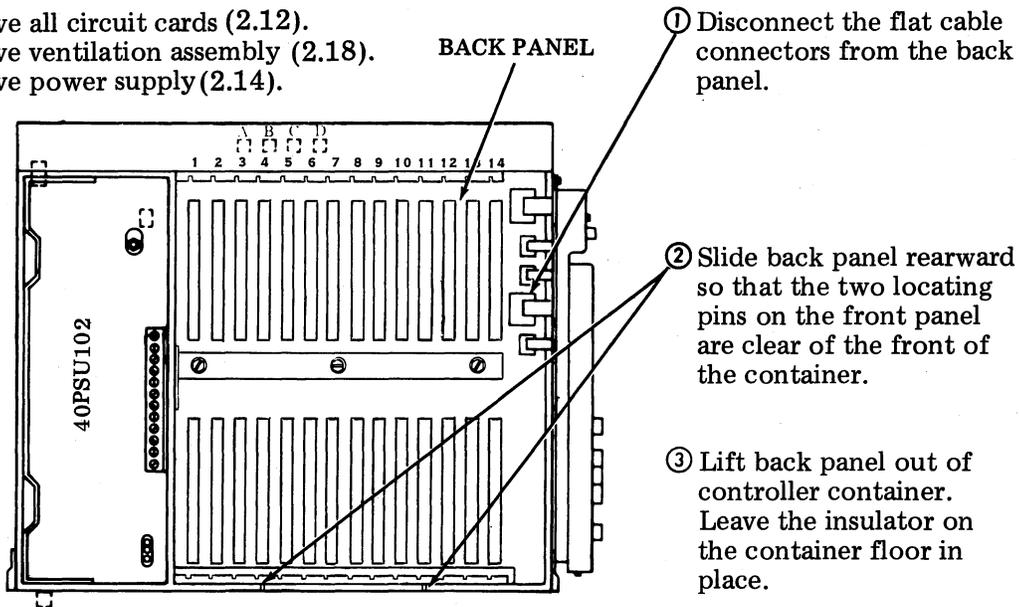

APPLICATION	INTERCONNECTION MODULE
SCC	405150
DCC	405151
MCC	405152

2.23 To replace the interconnection module, reverse the removal procedures of 2.22.

C. Back Panel

2.24 To remove the back panel:

- Remove all circuit cards (2.12).
- Remove ventilation assembly (2.18).
- Remove power supply (2.14).

2.25 To replace the back panel, reverse the removal procedures of 2.24.

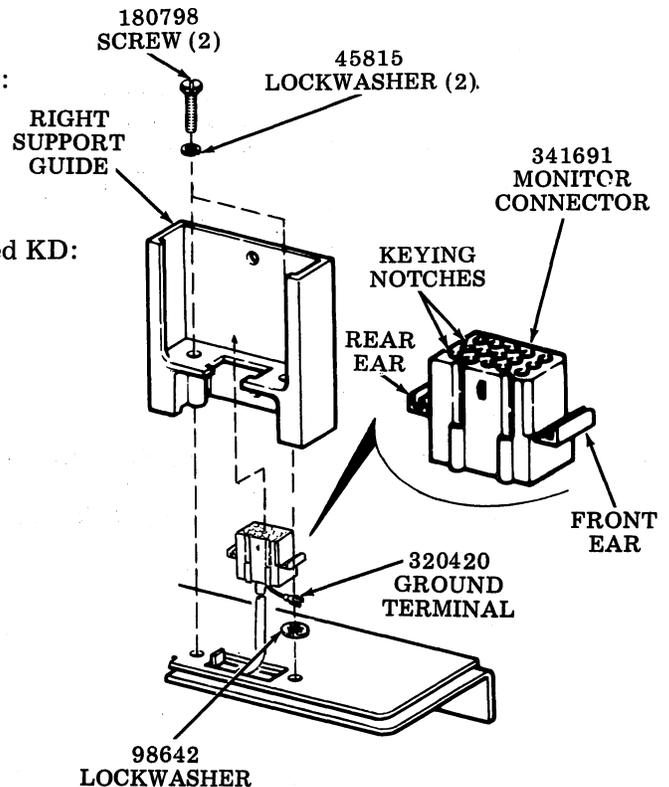

D. Cables

DCC, MCC — Opcon/Monitor (Controller-KD) Cables:

405301	6 ft	405304	50 ft
405302	12 ft	405139	75 ft
405303	25 ft	405140	100 ft

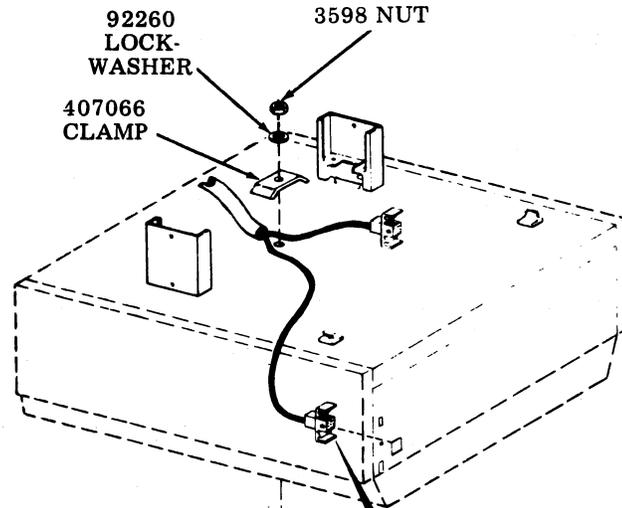

2.26 To remove opcon/monitor cable from attached KD:

- ① Remove monitor. Use flat blade of screwdriver against 341691 monitor connector front ear and use screwdriver shank against right support guide to hold ear in. With your other hand push down on front of connector to drop ear below mounting slot. Hold rear ear in and push down on connector.
- ② Remove two 180798 screws and 45815 lockwashers from right support guide.
- ③ Raise lid. Push connector down through hole in cover. Notice that the connector keying notches face the rear of the unit and that a 98642 lockwasher is positioned under the 320420 connector ground terminal on the front panel.

Proceed to Step 4 on following page.

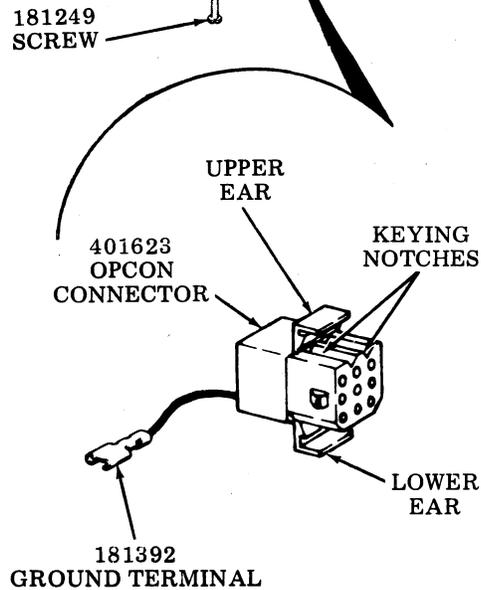

- ④ Remove opcon. Use flat blade of screwdriver against upper ear of 401623 opcon connector. With your other hand rock connector toward inside of cabinet. Push up on lower ear of connector and remove connector from front panel toward inside of cabinet.

- ⑤ Disconnect 181392 ground terminal of the cable from cabinet ground lug.

- ⑥ Remove 3598 nut, 92260 lockwasher, 407066 clamp and 181249 screw.

- ⑦ Remove cable from cabinet through opening at rear.

2.27 To install opcon/monitor cable to attached KD, either reverse the removal procedures of 2.26 or use Section 582-200-201. Observe an orange identification tag is on the KD end of the cable.

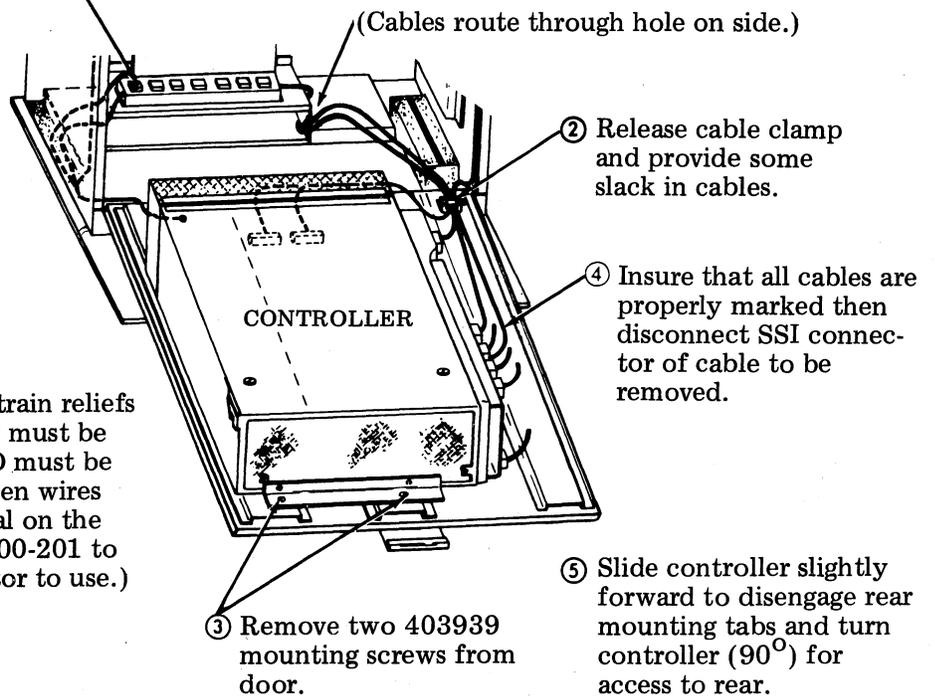

2.28 To remove opcon/monitor cable from free-standing KD:

- ① Remove monitor base bottom plate (see Section 582-200-201).
- ② Perform Steps 1, 2, and 3 of 2.26.
- ③ Remove opcon from opcon base assembly (see Section 582-200-201).
- ④ Remove cable including ground terminal from opcon base assembly (see 2.26, Steps 4 and 5).

2.29 To install opcon/monitor cable to free-standing KD, either reverse the removal procedures of 2.28 or use Section 582-200-201. Observe an orange identification tag is on the KD end of cable.

2.30 To remove opcon/monitor cable from controller:

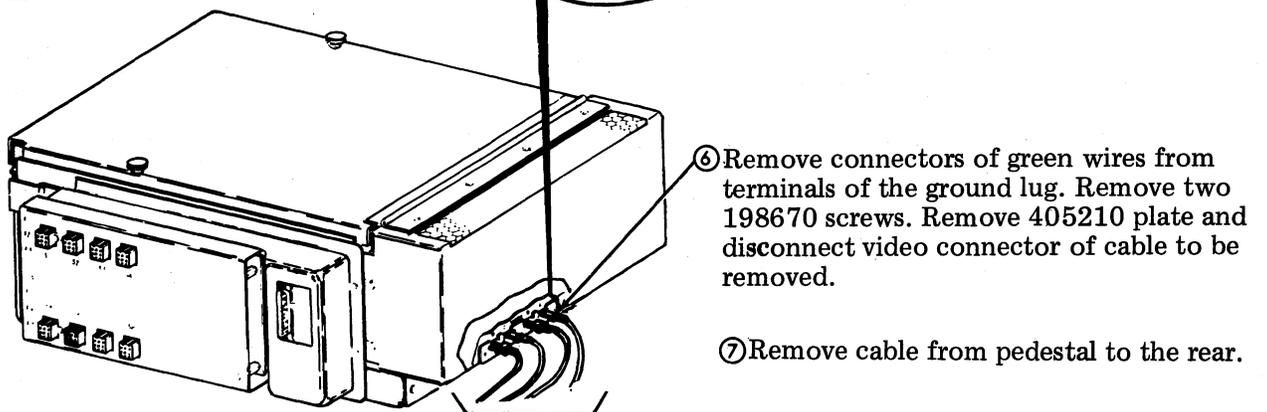

- ① Turn off pedestal power switch, open pedestal door, and unplug controller ac power cord from ac outlet.

*Note 2:* During reassembly, strain reliefs of video connectors to A and C must be facing up and reliefs to B and D must be facing down. Connectors of green wires must be connected to a terminal on the ground lug. (See Section 582-200-201 to select which controller connector to use.)

192009  
GROUND  
LUG

*Note 1:* The 192009 ground lug is assembled to 405210 plate clamp with two 1164 screws and two 405052 star washers.

*Note 3:* A green ground wire is part of each cable.

2.31 To install opcon/monitor cable to controller, reverse the removal procedures of 2.30.

## SECTION 582-200-701

### SCC, MCC --- Data Set Cables:

341896	5 ft	408067	25 ft
408065	7 ft	408068	50 ft
408066	12 ft		

#### 2.32 To remove data set cable:

- ① Turn off pedestal power switch, open pedestal door, release cable clamp. See 2.30 for part locations.
- ② Disconnect cable connector from controller. Remove cable from pedestal to the rear.
- ③ Disconnect cable connector from data set.

#### 2.33 To install data set cable, reverse removal procedures of 2.32.

### DCC, MCC --- Controller/Printer Cables:

405306	6 ft	405309	50 ft
405307	12 ft	405237	(10 ft stub to MCC or DCC)
405308	25 ft	405239	(10 ft stub to printer)

#### 2.34 To remove controller/printer cable:

- ① Turn off pedestal power switch, open pedestal door, release cable clamp. See 2.30 for part locations.
- ② Disconnect cable connector from controller.
- ③ Disconnect cable connector from printer. Disconnect ground terminal of cable from rear of printer (see 1.06 for part location).

#### 2.35 To install controller/printer cable, reverse the removal procedures of 2.34.

## 3. PARTS

- 3.01 For parts information on interconnect cables of the DATASPEED 40/4, refer to Section 582-200-401.
- 3.02 Parts information for individual components (printer, monitor, etc) are not illustrated in this section. Refer to appropriate BSP section.
- 3.03 Field replaceable components of controllers are listed in the index which follows the parts illustrations, see 3.04.

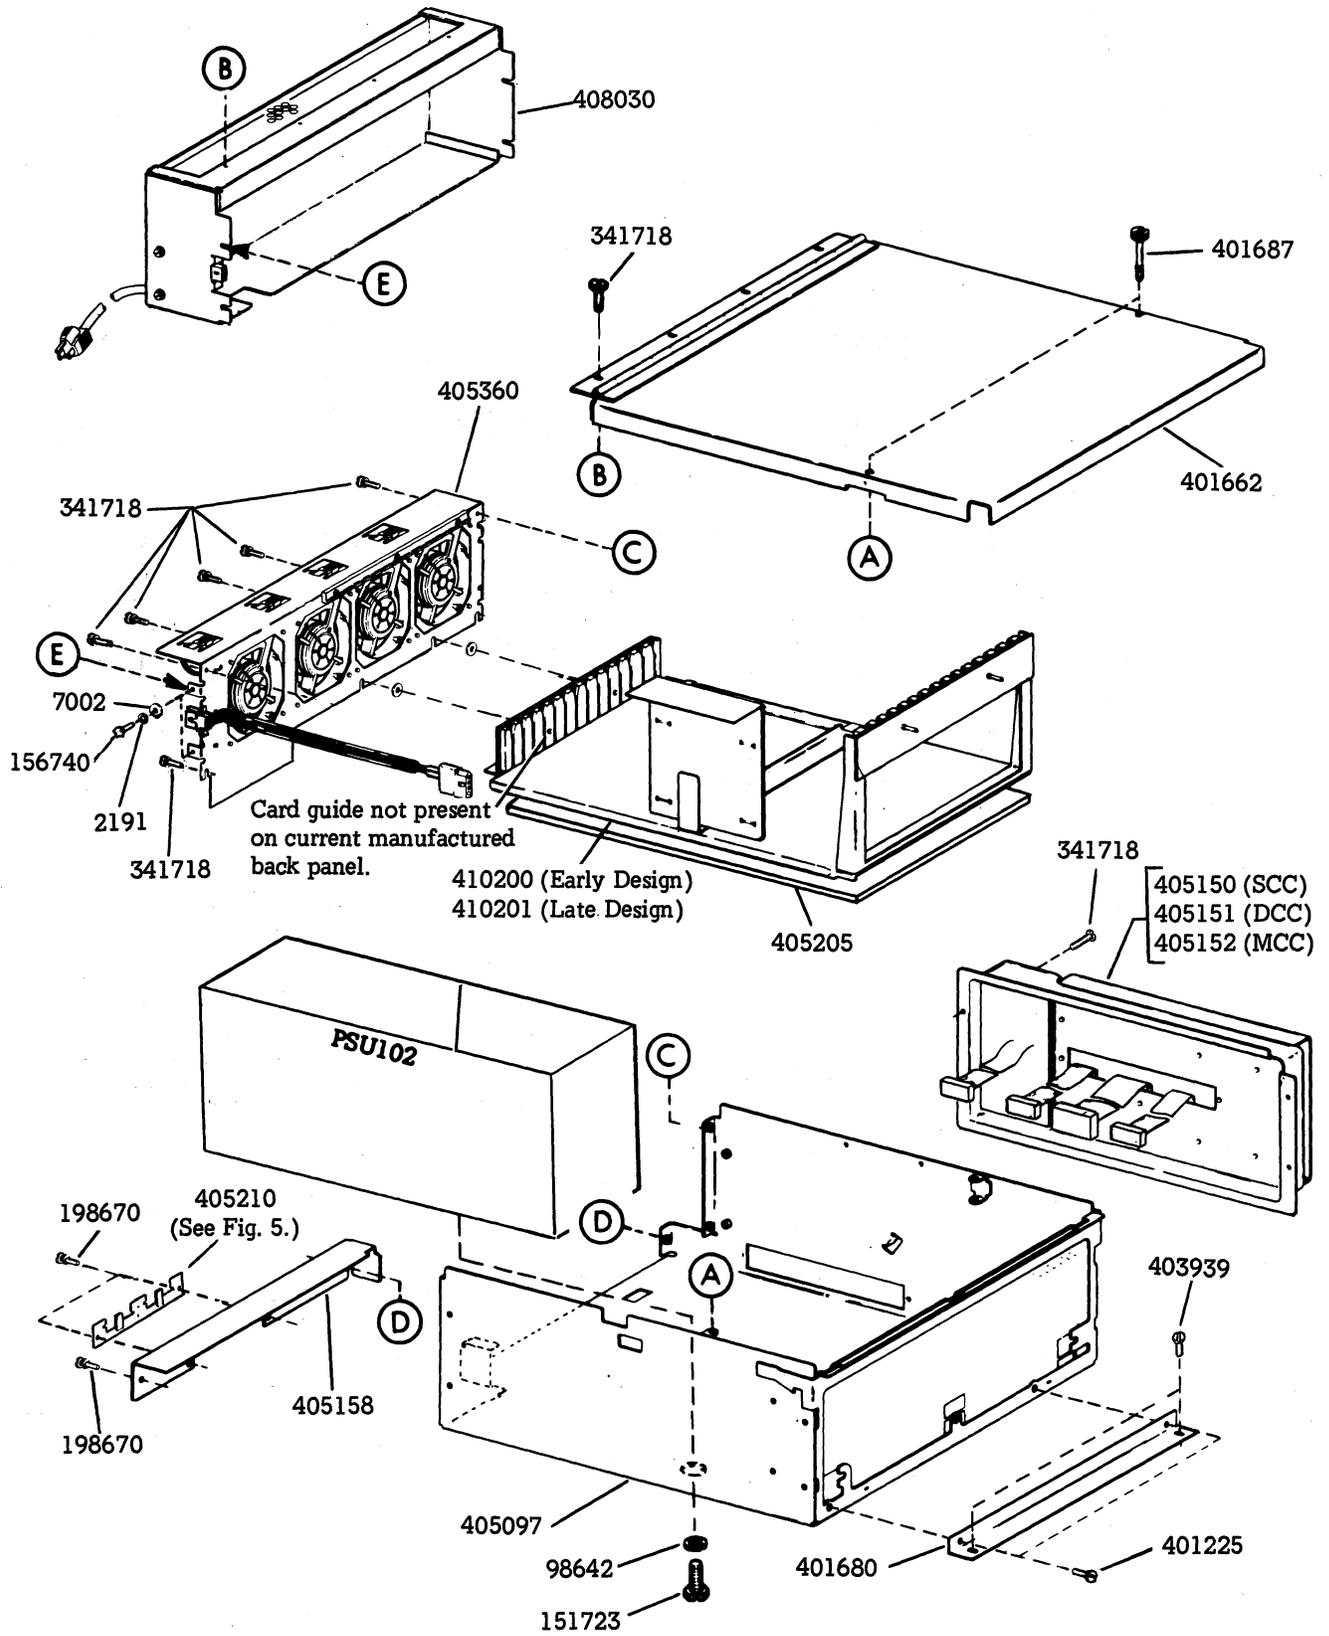

Fig. 1—Overview of Controller Components

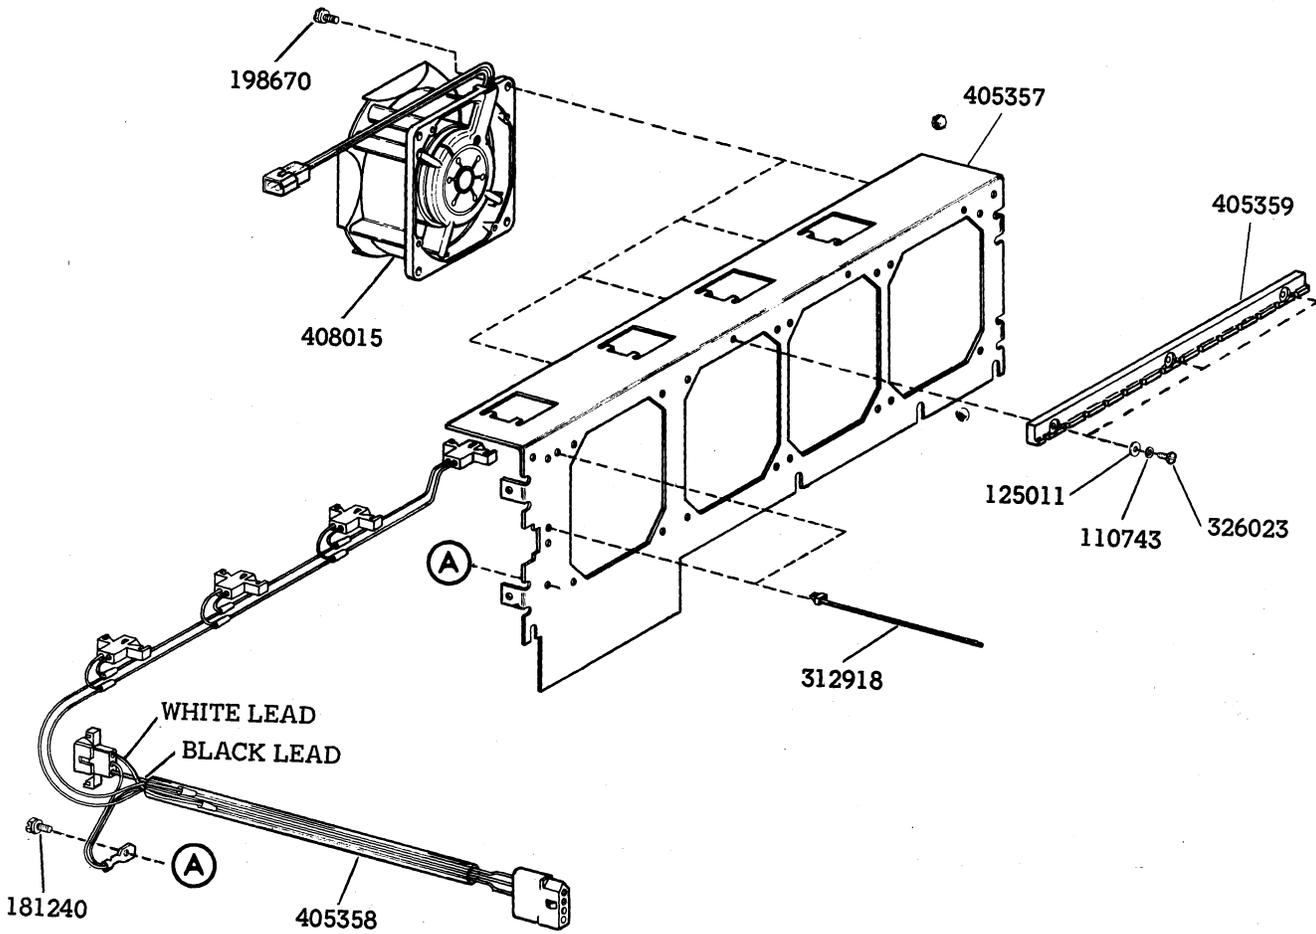

Fig. 2 - 405360 Ventilation Assembly Components

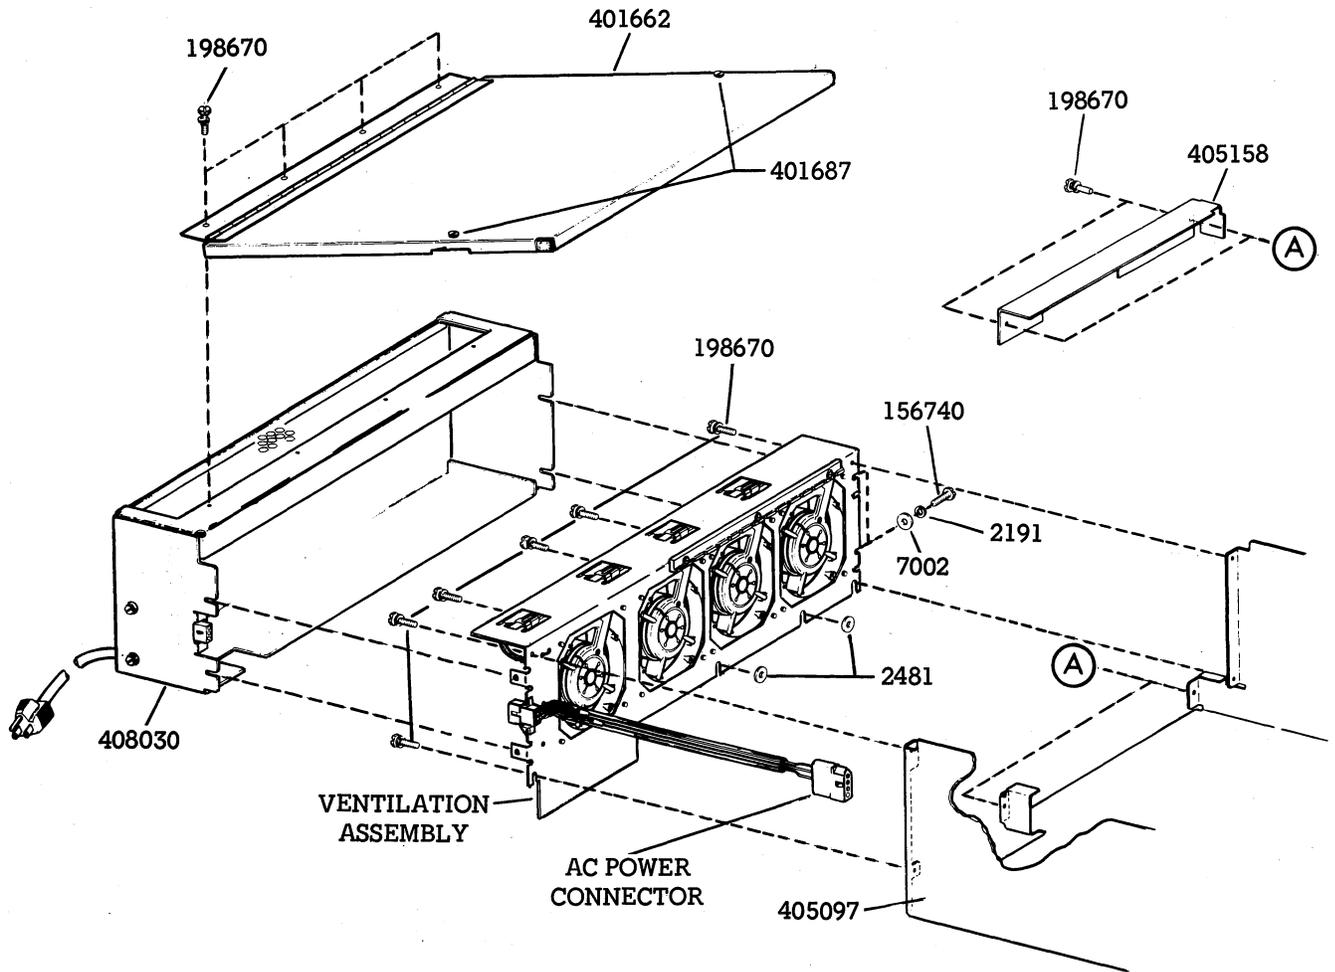

Fig. 3—Mounting Hardware for Fan Guard, Ventilation Assembly, and Cover

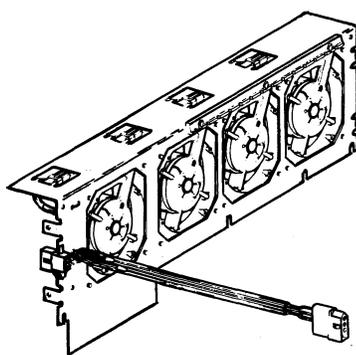

Fig. 4—Ventilation Assembly Detail

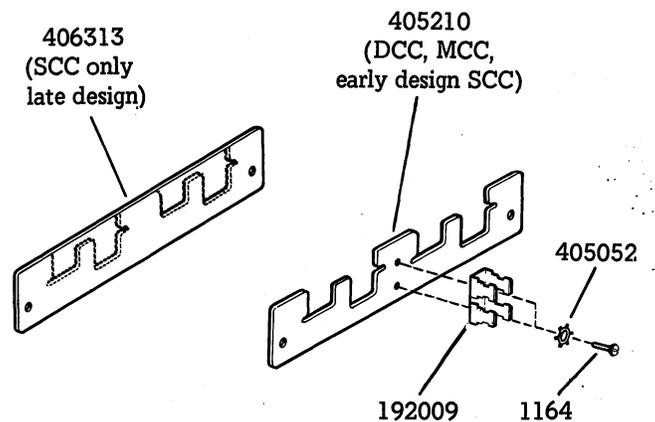

Fig. 5 — Clamp Plate Components (At Rear of Controller)

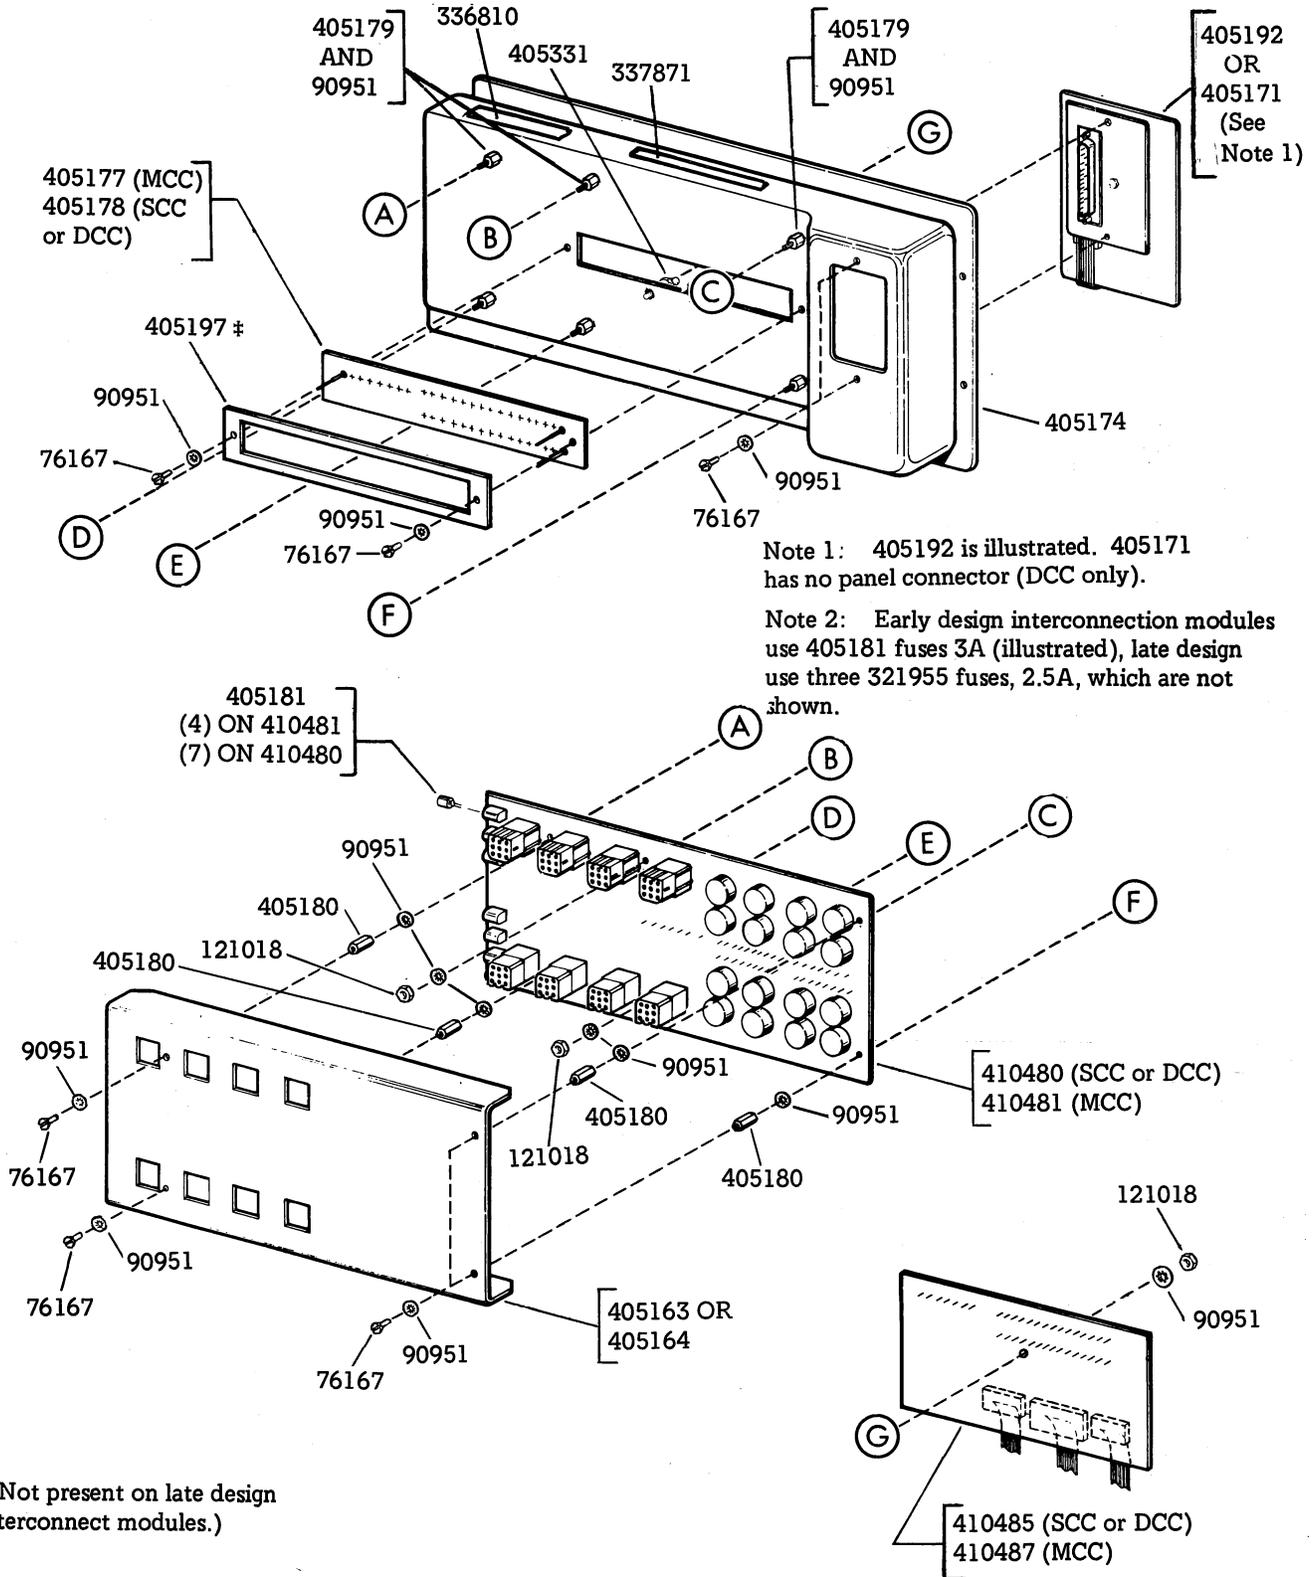

Fig. 6-405150, 405151, and 405152 Interconnection Modules

## INDEX OF REPLACEABLE PARTS

3.04 This index below contains field replaceable parts. The index shows the section, manual or page number of this section on which access is provided.

Note: When ordering replaceable components, unless otherwise specified, prefix each part number with the letters "TP" (ie, TP410055).

APPLICATION	PART NO.	DESCRIPTION	SECTION OR PAGE NO.
Monitor	40MN101/AA	Monitor	3
	341578	Fuse, 1.4 Amp	582-213-701
	341686	Fuse, 1.5 Amp (SL-BL) Glass	582-213-701
Opcon	40K104/DAB	Opcon (EBCDIC, (Typewriter Style)	3, 4
	40K105/CAA	Opcon (Internal Numeric Style)	3, 4
	40K203/GAB	Opcon (External Numeric Cluster Style)	3, 4
