Follow me
Hold my calls
What is my Reach-Me status?
Put me on schedule

CONTACTS:

Read my contacts
Get more detail
Look up <contact>*
* Say a specific name for <contact>

Tips:

- * If you do not hear a beep after you say something, repeat it.
- * To end any recording, be silent for a few seconds or press #.
- * UCC SA must ask "What can I do for you?" before you can initiate a command sequence.
- * While UCC SA is on hold (after you place a telephone call or you say "Take a break"), it listens for you to say "Avaya, come back."
- * For good speech recognition by UCC SA, minimize background noise.
- * If Speech Access cannot connect to your e-mail server, make sure you have completed the "Your E-mail Settings" section, including your current password, on the General tab of your User Preferences Web pages.
