

DATA SETS 101A AND 101B
3-ROW TELETYPEWRITER STATION ARRANGEMENT FOR TWX AND
DATA SET 101A FOR DATA-PHONE SERVICE
LOCATING TROUBLE AND TEST PROCEDURE

1.001 This addendum supplements Section 591-012-300 Issue 2.

1.002 This addendum is issued to include test information for Data Set 101A when used in DATA-PHONE* service. The title has been changed accordingly.

*Service Mark of American Telephone and Telegraph Company.

1.003 Due to similarities between 3-row teletypewriter station arrangements for TWX and DATA-PHONE service, the locating of trouble and test procedures will remain basically the same.

1.004 Automatic Sending and Receiving (ASR) and Receiving Only (RO) 100 wpm DATA-PHONE station arrangements using Model 28 teletypewriters can be tested from the 10A type testboard and 100 speed 3-row Automatic Data Test Lines (ADTL). The ADTL should be accessible from the DDD network. Numbered Forms when used, should be replaced by unnumbered forms or paper before a call is made to the ADTL.

1.005 The additional features of DATA-PHONE stations should be checked in accordance with installation tests contained in the Section entitled Data Sets 101A and 101B 3-Row Teletypewriter Station Arrangement For TWX and Data Set 101A for DATA-PHONE Service Tests and Installation methods (591-012-200).
