

DATA SETS 101A AND 101B
FIELD CONVERSION OF 3 ROW TWX STATIONS
FROM UNATTENDED TO ATTENDED SERVICE
OR VICE VERSA

1. GENERAL

1.01 This section describes the methods for converting existing 60 speed TWX services from unattended to attended, or vice versa.

1.02 It is reissued to correct paragraph 2.02 b, part 3.

2. CONVERSION PROCEDURES

2.01 No. 15 KSR and No. 19 ASR:

(a) Attended to Unattended

(1) Add - "V" answer back card.

(b) Unattended to attended

(1) Remove - "V" answer back card.

2.02 No. 28 KSR and No. 28 ASR:

(a) Attended to unattended

(1) Field conversion not practical. New equipment should be ordered.

(b) Unattended to attended

(1) Remove - Drum answer back card.

(2) Place a TP157274 clip on upper case "C" function pawl in slot 34 of the stunt box.

(3) Remove the "Here Is" keylever from the keyboard and install a TP153116 plug and TP117608 speed nut in its place.

2.03 Retain all removed parts. Protect them properly and place them in the cabinet of the station from which they were removed.
