

35 CONTROLMATIC TELETYPEWRITER DATA STATION ARRANGED FOR TWX SERVICE TESTS

1. GENERAL

1.01 This section provides references for testing the teletypewriter (TTY) and data set components that comprise a CONTROLMATIC data station for TWX service.

1.02 This section is reissued to correct the references listed in Part 2.

1.03 Since CONTROLMATIC on-line operation is identical to that of conventional Model 35 ASR TWX equipment, the data set test section for 4-row TWX may be used to test a CONTROLMATIC data station.

1.04 Specific CONTROLMATIC functions, related to format (off-line) operation, are tested in a section specifically prepared for CONTROLMATIC stations.

1.05 Mechanical tests and adjustments for TTY components, common to 35 TTYS, such as the keyboard, page printers, reperforator, etc, are covered in Sections 574-YYY-ZZZ applicable to such TTY equipment.

2. REFERENCES

2.01 The following sections are to be used for tests:

SECTION	TITLE
591-013-300	Data Set 101C Used With 4-Row TWX—Locating Trouble and Test Procedures
574-YYY-ZZZ	(Common TTY Equipment)
