

DATA AUXILIARY SET 806B-TYPE DESCRIPTION AND OPERATION

1. GENERAL

1.001 This addendum supplements Section 598-042-100, Issue 3.

1.002 This addendum is issued to revise the Data Auxiliary Set (DAS) 806B-types as follows:

- DAS 806B5 has been rerated to Addition and Maintenance (A&M).
- DAS codes 806B1, B2, B6, and B7 are rated MD and are superseded by DAS 806D1.
- 10A1 and 10A2 Data Units (DU) are rated MD and superseded by the 10A3 Data Unit.
- 14A2 Data Unit is rated A&M.
- Circuit pack (CP) AR119 is rated MD.
- Patchboard P-10H097 is rated MD.
- Sequential relay circuit CP CR1 is rated MD and is superseded by CR2.
- Coordination channel adapter unit CP CS3 is rated A&M.
- Inductor circuit DE1 is rated A&M.
- Circuit pack AR243 is rated A&M.
- DAS 804A1 is rated MD and is superseded by DAS 804A5.

3. FUNCTIONAL DESCRIPTION

The following change applies to Part 3:

3.18.1 The 10A3 DU with the B option installed is a direct replacement for the 10A1 DU and the 10A2 DU except when the 10A1 DU is used as an integral part of DAS 806B6. In this case, a slight modification must be made in the chassis wiring of DAS 806B6 consisting of adding a wire strap between terminals 14 and 20 of the J2 connector.

7. REFERENCES

The following change applies to Part 7:

- (a) 7.01—revised

7.01 The CDs and SDs for the apparatus and data units associated with DAS 806B-type are as follows:

- CD- and SD-1D097-01—Data Auxiliary Set 806B-Type
- CD- and SD-1D098-01—Data Unit 10A1 and 10A2
- CD- and SD-1D126-01—14A2 Data Unit
- CD- and SD-1D219-01—10A3 Data Unit.
