

INDEX OF TESTS
OFFICE LINK FRAME
AND OUTGOING TRUNK TEST FRAME

1. GENERAL INFORMATION

1.1 This section with Section 4A lists the tests to be applied to office link frames and the outgoing trunk test frame. It also lists the performance requirements for office link frame equipment in No. 1 crossbar offices. Test method details are contained in the separate sections listed herein and the test sets required for each test operation are shown. Cords and accessories are not listed, reference shall be made to detailed methods for these items.

1.2 Test Planning and Control: Refer to Section 0 for information required prior to planning or conducting job test operations.

1.3 The notes referred to in the column "See Notes" of Section 4A are listed below.

1.4 Sequence of Tests: Due to the variety of local job conditions and procedures no positive and definite sequence for performing all the tests contained in sections of this series, which would be applicable to each job, is prescribed. However, it is recommended that, in general, the

tests should be applied in the order indicated by the arrangement of tests in Section 4A. Where feasible, and with due regard to prescribed intervals and cycles, supplementary tests (except those which are performed as a part of routine tests) should be performed before routine tests. When there is a preferred sequence to be followed in performing the tests contained in individual sections, this sequence is indicated in the general information paragraph of the section or the arrangement of the methods information.

2. REQUIREMENTS

2.1 Tests listed in this summary conform to the requirements of BSP 634.001 Performance Requirements Section for No. 1 Crossbar Offices.

3. SUPPLEMENTARY TESTS

3.1 Section 4A lists all the supplementary tests required on office link frames and the outgoing trunk test frame.

4. ROUTINE TESTS

4.1 There are no routine tests specified for this equipment.

Engineer of Installation

Reason for Reissue:
To renumber section and general revision.

Replaces Section 0.3 dated 10-19-50.
