

INDEX OF TESTS  
 ORIGINATING MARKER, MARKER CONNECTOR  
 AND TROUBLE INDICATOR

1. GENERAL INFORMATION

1.1 This section with Sections 6A, 6B and 6C list the tests to be applied to the originating marker, marker connector and trouble indicator equipment, and also lists the performance requirements for that equipment in No. 1 crossbar offices. Test methods details are contained in the separate sections listed herein, and the test sets required for each test operation, are shown. Cords and accessories are not listed reference shall be made to detailed methods for these items.

1.2 Test Planning and Control: Refer to Section 0 for information required prior to planning or conducting job test operations.

1.3 The notes referred to in the "See Notes" column of sections 6A, 6B and 6C are listed below.

1.4 Sequence of Tests: Due to the variety of local job conditions and procedures no positive and definite sequence for performing all the tests contained in sections of this series, which would be applicable to each job, is prescribed. However, it is recommended that, in general, the tests should be applied in the order indicated by the arrangement of tests in

Sections 6A, 6B and 6C. Where feasible, and with due regard to prescribed intervals and cycles, supplementary tests (except those which are performed as a part of routine tests) should be performed before routine tests. When there is a preferred sequence to be followed in performing the tests contained in individual sections, this sequence is indicated in the general information paragraph of the section or the arrangement of the methods information.

2. REQUIREMENTS

2.1 Tests listed in this summary conform to the requirements of BSP 634.001 Performance Requirements Section for No. 1 Crossbar Offices.

3. SUPPLEMENTARY TESTS

3.1 Sections 6A, 6B and 6C list all the supplementary tests required on marker, marker connector and trouble indicator equipment.

4. ROUTINE TESTS

4.1 The following table shows the routine requirements which the equipment is to meet. Section 6C lists the information for making the tests.

Name of Test	Routine No.	Frequency		% Fail.	Performance		Test Set Required	Test Method	
		Min.	Max.		Last No. of Cycles	Ave. No. Cycles Req'd.		Sect.	Para.
Operating Test	2730	1-5	1-1	Clear	2	5	SD-25018 Orig. Tbl. Ind.	172.4	2
