

OUTSIDE PLANT

PRECAUTIONS

AERIAL WORK

- 1.001 This addendum supplements Section 620-101-010.
- 1.002 It is issued to add a restriction about the location of splices and terminals in the vicinity of power transmission lines.

3. PLACING STRAND AND CABLE

The following change applies to Part 3 of the section:

(a) 3.03 - added

3.03 The hazard of surprise electrical shock can exist when working on telephone plant that is near power transmission lines. To reduce the necessity for working on such plant, splices and terminals should not be planned closer than 100 feet from conductors of 100KV and higher power transmission lines.
