

BURIED PLANT
TERMINATION OF BURIED SERVICE WIRES
AT JUNCTIONS WITH AERIAL PLANT

1. GENERAL

1.001 This addendum supplements Section 629-720-200.

1.002 It is issued to provide information about the E-Z-CODE wire marker that may be used in lieu of B Glass Tape for identifying service wires.

The following change applies to Part 1 of the section.

(a) 1.06.1 - added.

1.06.1 E-Z-CODE wire markers may be used in lieu of B Glass Tape for identifying underground or service wires at terminations. Either the **Blank** wire marker or the **PR-L-A** precoded marker is suitable for use. These markers are the self-laminating vinyl type and can be written on in pencil or ink. Write the desired information on the marker, peel from the card backing, and apply to the wire so that the clear portion overlaps and protects the white, written-on part.
