

WIRE JOINING USING  
700, 701 AND 702 CONNECTORS  
AND E AND F CONNECTOR PRESSERS

1. GENERAL

1.001 This addendum supplements Section 632-205-215.

1.002 It is reissued to include information regarding the use of the G long nose plier.

1.003 Information regarding the encapsulation of splices when 700-type connectors are used is retained from the previous issue. The following change applies to Part 1 of the section:

- 1.03 — Note added

1.03 *Note:* It is necessary when using 700-type connectors in nonpressurized buried PIC cable to fill the splice closure with an approved encapsulating compound.

2. DESCRIPTION

The following change applies to Part 2 of the section:

- 2.20 — added

G Long Nose Plier

2.20 The G long nose plier is designed for pressing all 700-type connectors. Section 081-020-133 covers the description of the plier.
