

INTERNATIONAL SERVICE RESULTS

1. GENERAL

1.001 This addendum supplements Section 660-630-010, Issue 1, to provide for uniform treatment of a unique condition affecting satellite circuits.

1.002 Add the following to Part 2, 2.02:

- (g) Outage time on satellite circuits as the result of sun interference. At certain periods

during the spring and fall seasons, satellite circuits are degraded by noise due to the relative positions of the satellite, the earth, and the sun. The occurrence of the noise is predictable.
