

**Methods & Procedures**  
**Engine/Alternator Sets**

This document is currently under construction and is expected to be published within the first quarter of 2001. The document shall outline standards and procedures governing the deployment and maintenance of Engine/Alternator Sets. Review drafts will go out as the process continues.

All standards in reference to the planning of standby AC Engine/Alternator sets or DC Generation sets may be found in BSP 790-100-652MP "Planning & Structure of DC Power Plants, AC & DC Generation Systems". All information on standard specifications of Engine/Alternator Sets may be found in BSP 790-100-658MP "Standard Specification and Performance Requirements for Engine/Alternator Sets".

Please refer any questions on the above mentioned documents and this BSP to Nicole Kurant, Area Manager – Common Systems Power Technical Staff @ 517-552-9187.
