

TEST SET CARRYING CASES

1. GENERAL

1.01 This section describes the carrying cases which have been developed to support the metal case box type sets and to protect them from mechanical injury when they are transported between offices.

2. DESCRIPTION

2.01 The carrying cases, which are listed below, are as light and strong as is consistent with good design for supporting the weights of the various test sets.

<u>Code No.</u>	<u>Use</u>	<u>Inside Dimensions Without Pads</u>
KS-5205	For hand size test sets	5-1/2"x8"x9-1/4"
KS-5206	For small ladder size test sets	9"x9-5/8"x11-3/4"
KS-5207	For medium ladder size test sets	9-5/8"x11"x17"

<u>Code No.</u>	<u>Use</u>	<u>Inside Dimensions Without Pads</u>
KS-5208	For large ladder size test sets	9-5/8"x13-5/8"x21-3/4"
KS-5209	For table size test sets	11-5/8"x14-1/2"x24-1/2"

2.02 These cases consist of black fibre trunk material riveted together and have the edges bound with angle fibre. All corners on the outside are protected by metal corner pieces riveted to the fibre trunk material. A hinged cover is provided and arranged for fastening on the front by means of a lock in the center and a draw bolt catch on each side. A leather handle is furnished. The inside of the case is sufficiently padded to secure a snug fit and has a clamping effect when the cover is closed.

2.03 Fig. 1 shows the large ladder size test set carrying case with a test set in place.
