(Order hose and attachments desired by list
numbers given below:)

Heavy duty portable upright tank-type vacuum cleaners. The List 3 cleaner is a standard type cleaner, designed to use paper filters. The List 4 cleaner is similar to the List 3 except for several motor refinements which result in quieter operation and it is recommended for locations where the noise must be kept to a minimum. Pamphlet No. 6013, which is supplied with Conversion Kit List 25, gives the necessary information for converting Lists 1 and 2 Cleaners for use with the paper filters. The cleaners are about 10" in diameter and 18-1/2" high, exclusive of the handle. The weight, without attachments, is approx. 23 lbs. They may be mounted on a rolling ladder by using a No. 32B ladder bracket. The 25-ft. cord terminates in a parallel, nonpolarized plug. For replacement part information see Section A509.965.

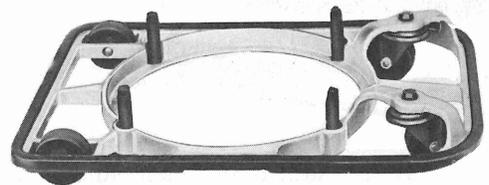

For general use.

The hose, attachments, carriage and carton of paper filters must be ordered separately in accordance with the ordering information given below. The attachment end of the KS-14377 Lists 11 and 12 hose accommodates the standard tools and fittings,

used with former cleaners, including the No. 454A and 455A tools and the KS-2629 and KS-2852 attachments. When the hose is equipped with the KS-14410 List 21 adapter, the KS-14410 Lists 12 to 20 attachments, inclusive, may also be used. The KS-14377 attachments are for general use except for the Lists 14 and 15 which have the special uses stated under the illustration.

When ordering hose, cleaning attachments, or carriage, use the wording given below:
