

**PLUGS
COMMON SYSTEMS**

1. GENERAL

1.01 This appendix is issued to clarify the usage of 165 and 258 type plugs for maintenance and operation of equipment in central offices, and lists and illustrates the 165 type plugs which are not covered by Section A710.059.

specify the specific code of a dummy plug to be used, the following information shall be used as a general guide in determining the type of plug to be selected for use in a particular type of jack.

2. PLUGS

2.01 When a Bell System Practices section or other instructions do not

2.02 At various times the 165C and 165D plugs have been redesigned. The latest 165C and 165D plugs are shown in Section A710.059. Those of preceding design are listed and illustrated in Figures 1, 2, and 3 of this appendix.

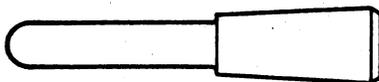

<u>Type of Jack</u>	<u>Plug Contacts of Jacks</u>	<u>Code of Plug to be Used</u>		<u>See Note</u>
		<u>Metallic</u>	<u>Dummy</u>	
218, 225, 227, 281) or Similar Type)	Tip and Sleeve	47, 116 or Similar Type	165, 165B 165C, 165D	A
49, 240, 242 or) Similar Type)	Tip, Ring and Sleeve	110, 310 or Similar Type	258A, 258B 258C, 258D	B

NOTE A: The 165 type plugs shall not be used in jacks having tip, ring and sleeve plug contacts as they tend to distort the tip spring, causing an increased maintenance condition.

NOTE B: The 258 type plugs shall not be used in jacks having only tip and sleeve plug contacts as they may not close or open the auxiliary contacts, causing a failure in the operation of the circuit.

No. 165C PLUG *Mf. Disc.*

Replaces No. 165B Plug.
Replaced by 165C Plug,
