

Western Electric Co., Incorporated,
Equipment Engineering Branch, Hawthorne

(1 Pages, Page 1)
Issue 4 BT-51009-01
Appendix #1
June 24, 1931.
Replacing all previous
issues.

9F + page 10

This Appendix was Prepared from Issue 29 of Drawing ST-51009-01.

METHOD OF OPERATION

Panel System - Sender Circuit - Subscriber's 2 Digit Non-Coin

Change the second sentence in paragraph 90. to read:-

"The operation of the (MSL) relay disconnects the tip and ring of the line from the sender (L) relay, and when "AG" wiring is used connects its non-inductive winding across the (L) relay or when "AH" wiring is used connects an 18 type 800 ohm resistance across the (L) relay holding it operated to prevent a false disconnect.
