

TELEPHONE SETS
540 AND 560 TYPES
DESCRIPTION AND USE

1. GENERAL

1.01 This addendum which supplements Section C32.558, is issued to provide information regarding those 540 and 560 type telephone sets that are stocked at the Local Distributing House. This addendum should be retained with subsequent issues of the section until notice is given covering its cancellation or reissue.

1.02 Table A of this addendum replaces Table A of the section. In order to reduce requirements for various types of Key-In-Base sets seven telephone sets have been selected for use in this Area. These seven telephone sets should fill all requirements for the 540 or 560 type telephone set.

1.03 Normally the 540 or 560 type telephone set should only be ordered when required for transmission reasons, usually in transmission Zone 5. Requisitions should be marked "DO NOT SUBSTITUTE" when these telephone sets are required.

1.04 When supply conditions warrant, 540 or 560 type telephone sets may be substituted for the equivalent 440 or 460 type telephone sets.

1.05 Insofar as possible 540 or 560 type telephone sets should not be installed on the same key telephone system as 440 or 460 type telephone sets.
